Notes to the interim consolidated financial statements (unaudited)

1. Nature of business and basis of presentation

Global Atlantic Financial Limited, a Bermuda company, (together with its subsidiaries, "Global Atlantic," the "Company," we, our, or us) is a leading United States, or "U.S.," retirement and life insurance company focused on delivering meaningful long-term value for our customers and shareholders.

The Company is a leading insurance company meeting the retirement and life insurance needs of individuals and institutions. The Company primarily offers individuals fixed-rate annuities, fixed-indexed annuities, and targeted life products through a network of banks, broker-dealers, and independent marketing organizations.

The unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, or "U.S. GAAP," on a basis consistent with reporting interim financial information. The accompanying interim consolidated financial statements are unaudited and reflect all material adjustments necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods presented in conformity with U.S. GAAP. Except for balances affected by the adoption of Accounting Standards Update ("ASU") 2018-12 noted in Note 2—"Significant accounting policies and practices", the December 31, 2022 consolidated balance sheet data was derived from audited consolidated financial statements for the year ended December 31, 2022, which include all disclosures required by GAAP. Therefore, these interim condensed consolidated financial statements should be read in conjunction with the 2022 consolidated financial statements of the Company. The results of operations for the three and nine months ended September 30, 2023 are not necessarily indicative of the results for any subsequent periods or the entire fiscal year ending December 31, 2023.

The preparation of financial statements in conformity with U.S. GAAP requires the Company to make estimates and assumptions that affect the amounts reported in the interim consolidated financial statements and accompanying notes. Amounts based on such estimates involve numerous assumptions subject to varying and potentially significant degrees of judgment and uncertainty, particularly related to the future performance of the underlying business. Actual experience could materially differ from these estimates and assumptions. The most significant estimates are those used in determining valuation of policy liabilities, valuation of embedded derivatives, valuation and impairment of investments, amortization of deferred revenues and expenses, and the annual effective tax rate.

KKR acquisition of Global Atlantic Financial Group Limited

On February 1, 2021, KKR & Co. Inc., or together with its subsidiaries, "KKR," completed the acquisition of the Company's ultimate parent, Global Atlantic Financial Group Limited, or "GAFG," by Magnolia Parent LLC ("Magnolia"), a KKR subsidiary, as contemplated by the Agreement and Plan of Merger, dated July 7, 2020 (as amended, the "Merger Agreement"), by and among GAFG, Global Atlantic Financial Life Limited, or "GAFLL," Magnolia, Magnolia Merger Sub Limited ("Merger Sub"), LAMC LP, and Goldman Sachs & Co. LLC, solely in its capacity as the equity representative, referred to here-in as the "KKR Acquisition." The total purchase price for the transaction was \$4.7 billion. Upon the conclusion of the acquisition, Magnolia was renamed to The Global Atlantic Financial Group LLC ("TGAFG").

Notes to the interim consolidated financial statements (unaudited)

2. Significant accounting policies

In addition to the new or revised accounting policies detailed below, for additional information on the Company's other significant accounting policies, see Note 2—"Basis of presentation and significant accounting policies and practices" in the Company's audited consolidated financial statements as of December 31, 2022.

Significant accounting policies

Deferral and amortization of certain revenues and expenses

Deferrals

Deferred policy acquisition costs ("DAC") consist of commissions and other costs that are directly related to the successful acquisition of new or renewal life insurance or annuity contracts. DAC is estimated using a group approach, instead of on an individual contract level. DAC groups, or cohorts, are by product type and issue year and consistent with the groups used in estimating the associated insurance liability. DAC is recorded in insurance intangibles in the consolidated balance sheets.

Value of business acquired ("VOBA") represents the difference between the carrying value of the purchased insurance contract liabilities at the time of the business combination and the estimated fair value of insurance and reinsurance contracts. VOBA can be either positive or negative. Positive VOBA is recorded in insurance intangibles. Negative VOBA is recorded in the same financial statement line in the consolidated balance sheets as the associated reserves.

For limited-payment products (e.g., payout annuities), gross premiums received in excess of net premiums are deferred at initial recognition as a deferred profit liability ("DPL"). DPL is measured using assumptions consistent with those used in the measurement of the liability for future policy benefits, including discount rate, mortality, lapses, and expenses. DPL is recorded in policy liabilities in the consolidated balance sheets.

For certain preneed contracts, the gross premium is in excess of the benefit reserve plus additional insurance liability. An unearned front-end load ("UFEL") is established to defer the recognition of this front-end load. UFEL is recorded in policy liabilities in the consolidated balance sheets.

Amortization

DAC is amortized on a constant level basis for the grouped contracts over the expected economic life of the related contracts. The Company amortizes DAC for all products on a constant level basis based on policy count, except for DAC for traditional life products that are amortized on a constant level basis based on face amount. The constant level bases used for amortization are projected using mortality and lapse assumptions that are based on the Company's experience, industry data, and other factors and are consistent with those used for the liability for future policy benefits. If those projected assumptions change in future periods, they will be reflected in the cohort level amortization basis at that time. Unexpected lapses, due to higher mortality and lapse experience than expected, are recognized in the current period as a reduction of the capitalized balances.

Notes to the interim consolidated financial statements (unaudited)

Amortization of DAC is included in amortization of policyholder acquisition costs in the consolidated statements of income.

VOBA is generally amortized using the same methodology and assumptions used to amortize DAC.

DPL is amortized and recognized in proportion to insurance in force for life insurance contracts and expected future benefit payments for annuity contracts. Interest is accreted on the balance of the DPL using the discount rate determined at contract issuance. The Company reviews and updates its estimates of cash flows for the DPL at the same time as the estimates of cash flows for the liability for future policy benefits. When cash flows are updated, the updated estimates are used to recalculate the DPL at contract issuance. The recalculated DPL as of the beginning of the current reporting period is compared to the carrying amount of the DPL as of the beginning of the current reporting period, and any difference is recognized as either a charge or credit to net policy benefits and claims.

UFEL is amortized consistent with the amortization of DAC on preneed contracts.

The key assumptions used in the calculation of the amortization of these balances are reviewed quarterly and updated if actual experience or other evidence suggests that current assumptions should be revised. In addition, the Company formally reviews assumptions annually as part of the assumptions review process. The effects of changes in assumptions are recorded in net income in the period in which the changes are made.

Internal replacements

An internal replacement is a modification in product benefits, features, rights, or coverages that occurs by the legal extinguishment of one contract and the issuance of another contract (a contract exchange), or by amendment, endorsement, or rider to a contract, or by the election of a benefit, feature, right, or coverage within a contract. If the modification does not substantially change the contract, the unchanged contract is viewed as a prospective revision and the unamortized DAC is adjusted prospectively. As such, unamortized DAC and other associated balances from the unchanged contract are retained and acquisition costs incurred to modify the contract are not deferred but expensed as incurred. Other balances associated with the unchanged contract, such as any liability for future policyholder benefit or market risk benefits, should similarly be accounted for as if the unchanged contract is a continuation of the original contract. If an internal replacement represents a substantial change, the original contract is considered to be extinguished and any related DAC or other policy balances are charged or credited to income, and any new deferrable costs associated with the replacement contract are deferred.

Separate accounts

Separate account assets and liabilities represent segregated funds administered and invested by the Company for the benefit of variable annuities and variable universal life insurance contractholders and certain pension funds. The Company reports separately, as assets and liabilities, investments held in the separate accounts and liabilities of separate accounts if: (1) such separate accounts are legally recognized; (2) assets supporting the contract liabilities are legally insulated from the Company's general account liabilities; (3) investments are directed by the contract owner or participant; and (4) all investment performance, net of contract fees and assessments, is passed through to the contract owner.

Notes to the interim consolidated financial statements (unaudited)

Separate account assets consist principally of mutual funds at fair value. The investment income and gains and losses of these accounts generally accrue to the contractholders and therefore, are not included in the Company's net income. However, the Company's net income reflects fees assessed and earned on fund values of these contracts which are presented as a component of policy fees in the consolidated statements of income. Realized investment gains and losses related to separate accounts that meet the conditions for separate account reporting accrue to and are borne by the contractholder.

Policy liabilities

Policy liabilities, or collectively, "reserves," are the portion of past premiums or assessments received that are set aside to meet future policy and contract obligations as they become due. Interest accrues on these reserves and on future premiums, which may also be available to pay for future obligations. The Company establishes reserves to pay future policyholder benefits, claims, and certain expenses for its life policies and annuity contracts.

Reserves are estimates based on models that include many actuarial assumptions and projections. These assumptions and projections, which are inherently uncertain, involve significant judgment, including assumptions as to the levels and/or timing of premiums, benefits, claims, expenses, interest credits, investment results (including equity market returns), mortality, longevity, and persistency.

The assumptions on which reserves are based are intended to represent an estimation of experience for the period that policyholder benefits are payable. The adequacy of these reserves and the assumptions underlying those reserves are reviewed at least annually. The Company cannot, however, determine with precision the amount or the timing of actual policyholder benefit payments. If actual experience is better than or equal to the assumptions, then reserves would be adequate to provide for future policyholder benefits and expenses. If experience is worse than the assumptions, additional reserves may be required to meet future policy and contract obligations. This would result in a charge to the Company's net income during the period in which excess policyholder benefits are paid or an increase in reserves occurs.

For a majority of the Company's in-force policies, including its universal life policies and most annuity contracts, the base policy reserve is equal to the account value. For these products, the account value represents the Company's obligation to repay to the policyholder the amounts held on deposit. However, there are several significant blocks of business where additional policyholder reserves are explicitly calculated, including fixed-indexed annuities, variable annuities, universal life with secondary guarantees, indexed universal life and preneed policies.

Annuity contracts

Fixed-indexed annuities ("FIA")

Policy liabilities for fixed-indexed annuities earning a fixed rate of interest and certain other fixed-rate annuity products are computed under a retrospective deposit method and represent policyholder account balances before applicable surrender charges. For certain fixed-rate annuity products, an additional reserve was established for above market interest rate guarantees upon acquisition. These reserves are amortized on a straight-line basis over the remaining guaranteed interest rate period.

Notes to the interim consolidated financial statements (unaudited)

Certain of the Company's fixed-indexed annuity products enable the policyholder to allocate contract value between a fixed crediting rate and strategies which reflect the change in the value of an index, such as the S&P 500 Index or other indices. These products are accounted for as investment-type contracts. The liability for these products consists of a combination of the underlying account value and an embedded derivative value. The liability for the underlying account value is primarily based on policy guarantees and its initial value is the difference between the premium payment and the fair value of the embedded derivative. Thereafter, the account value liability is determined in a manner consistent with the accounting for a deposit liability under the "effective yield method" (previously referred to in the Annual Report as the "constant yield method"). All future host balances are determined as: (1) the initial host balance; (2) plus interest; (3) less applicable policyholder benefits. The interest rate used in the prior roll forward is re-determined on each valuation date, per the effective yield method. The embedded derivative component's fair value is based on an estimate of the policyholders' expected participation in future increases in the relevant index. The fair value of this embedded derivative component includes assumptions, including those about future interest rates and investment yields, future costs for options used to hedge the contract obligations, projected withdrawal and surrender activity, benefit utilization and the level and limits on contract participation in any future increases in the respective index option. The account value liability and embedded derivative are recorded in policy liabilities in the consolidated balance sheets, with changes in value of the liabilities recorded in policy benefits and claims in the consolidated statements of income.

Contractholder deposit funds reserves for certain assumed blocks of fixed-indexed and fixed-rate annuity products are accounted for as investment-type contracts. A net liability (consisting of the benefit reserve plus deferred revenue liability less ceding commission paid between a ceding and assuming reinsurance company) is established at inception and amortized under the effective yield method.

The Company issues registered index-linked annuity (RILA) contracts, which are similar to FIAs in offering the policyholder the opportunity to participate in the performance of a market index, subject to a cap or adjusted for a participation rate. In contrast to the FIA, the RILA enables policyholders to earn higher returns but with the risk of loss to principal and related earnings. In particular, if performance of the market indices is negative, the policyholder may potentially absorb losses, subject to downside protection in the form of either a "buffer" or a "floor" specified in the contract. A "buffer" is protection from downside performance up to a certain percentage, typically 10 percent, with uncapped losses thereafter. A "floor" is protection from downside performance in excess of the "floor," e.g., if the floor is 10% then the policyholder absorbs losses up to 10% but not in excess.

The RILA is accounted for similar to the FIA. The RILA host contract is calculated at the inception of the contract as the value of the initial premium minus the value of the index option, which is an embedded derivative. That initial host value is then accreted to the guaranteed surrender value at the end of the surrender charge period. The RILA index option, which is an embedded derivative, is required to be measured at fair value. Fair value represents the policyholders' expected participation in future increases in the relevant index and is calculated as the excess cash flows from the indexed crediting feature above the guaranteed cash flows. The excess cash flows are based on the option budget methodology whereby the indexed account is projected to grow by the option budget. A key difference from a standard FIA product is that the RILA policyholder can lose principal on this investment. Therefore, it is possible that the embedded derivative can become negative. The option budget will be calculated depending on the product type and strategy. The growth in the indexed account will be projected based on the value of the options dependent upon the strategy and associated hedge construction. The fair value of this embedded derivative

Notes to the interim consolidated financial statements (unaudited)

component includes assumptions, including those about future interest rates and investment yields, future costs for options used to hedge the contract obligations, projected withdrawal and surrender activity, benefit utilization and the level and limits on contract participation in any future increases in the respective index option. The account value liability and embedded derivative are recorded in policy liabilities in the consolidated balance sheets, with changes in value of the liabilities recorded in policy benefits and claims in the consolidated statements of income.

Variable annuities

The Company issues and assumes variable annuity contracts for which the liabilities are included in policy liabilities in the consolidated balance sheets. The change in the liabilities for these benefits is included in policy benefits and claims in the consolidated statements of income. Variable annuity contracts may have certain guarantees that are accounted for as market risk benefits, which are discussed in more detail below.

Funding agreements

The Company issues funding agreements to certain unaffiliated special purpose entities that have issued debt securities for which payment of interest and principal is secured by such funding agreements. The Company also has similar obligations to federal home loan banks. The Company's funding agreements are considered investment type contracts and liabilities are net deposits plus accrued and unpaid interest. The Company's obligation is reported in policy liabilities in the consolidated balance sheets. Interest expense is calculated using the effective interest method and recorded in policy benefits and claims in the consolidated statements of income.

Interest-sensitive life products

For universal life policies, the base policy reserve is the policyholder account value.

Policy liabilities for indexed universal life with returns linked to the performance of a specified market index are equal to the sum of two components: (1) the fair value of the embedded derivative; and (2) the host (or guaranteed) component. The fair value of the embedded derivative component is based on the fair value of the policyholders' expected participation in future increases in the relevant index over the life of the contract. The fair value of this embedded derivative component includes assumptions, including those about future interest rates and investment yields, future costs for options used to hedge the contract obligations, projected benefits, benefit utilization and the level and limits on contract participation in any future increases in the respective index option.

The initial host balance is established at the time of premium payment and is equal to the total account value less the embedded derivative component. Thereafter, the balance of the host component is determined in a manner consistent with the accounting for a deposit liability under the "effective yield method." All future host balances are determined as: (1) the initial host balance; (2) plus interest; (3) less applicable policyholder benefits. The interest rate used in the prior roll forward is re-determined on each valuation date, per the effective yield method.

Preneed policies

The Company's preneed life insurance contracts are accounted for as universal life-type contracts which require that the retrospective deposit method be used. That accounting

Notes to the interim consolidated financial statements (unaudited)

method establishes a liability for policyholder benefits in an amount determined by the account or contract balance that accrues to the benefit of the policyholder. This account value is deemed to be equal to the contract's statutory cash surrender value. The majority of the Company's preneed insurance contracts feature death benefits with a discretionary death benefit growth rate. The Company has the discretion to adjust these rates up or down. The Company has established an additional reserve for expected future discretionary benefits which is reflected as policy liabilities in the consolidated balance sheets. The Company has also issued preneed insurance contracts with crediting rates tied to inflation as measured by the U.S. Consumer Price Index.

Traditional life and limited payment contracts

Liability for future policy benefits

A liability for future policy benefits, which is the present value of estimated future policy benefits to be paid to or on behalf of policyholders and certain related expenses less the present value of estimated future net premiums to be collected from policyholders, is accrued as premium revenue is recognized. The liability is estimated using current assumptions that include mortality, lapses, and expenses. These current assumptions are based on judgments that consider the Company's historical experience, industry data, and other factors.

For nonparticipating traditional and limited-payment contracts, contracts are grouped into cohorts by contract type and issue year. The liability is adjusted for differences between actual and expected experience. With the exception of the expense assumption, the Company reviews its historical and future cash flow assumptions quarterly and updates the net premium ratio used to calculate the liability each time the assumptions are changed. The Company has elected to use expense assumptions that are locked in at contract inception and are not subsequently reviewed or updated.

Each quarter, the Company updates its estimate of cash flows expected over the entire life of a group of contracts using actual historical experience and current future cash flow assumptions. These updated cash flows are discounted using the discount rate or curve on the original contract issue date to calculate the revised net premiums and net premium ratio, which are used to derive an updated liability for future policy benefits. This amount is then compared to the carrying amount of the liability before the updating of cash flow assumptions to determine the current period change in liability estimate. This current period change in the liability is the liability remeasurement gain or loss and is presented parenthetically as a separate component of benefit expense in the consolidated statements of income.

For nonparticipating traditional and limited-payment contracts, the discount rate assumption is a spot rate yield curve that is derived based on upper medium grade (low credit risk) fixed-income instruments with similar duration to the liability. The Company uses one or more external indices of corporate credit issues as its proxy for these instruments. The discount rate assumption is updated quarterly and used to remeasure the liability at the reporting date, with the resulting change in the discount rate reflected in other comprehensive income. For liability cash flows between two market observable points on the yield curve, the Company interpolates the effective yield by holding the marginal rates constant. For liability cash flows that are projected beyond the last market-observable point on the yield curve, the Company uses the last market-observable yield level.

Notes to the interim consolidated financial statements (unaudited)

Payout annuities

Payout annuities include single premium immediate annuities, annuitizations of deferred annuities, pension risk transfer and structured settlements. These contracts subject the insurer to risks over a period that extends beyond the period or periods in which premiums are collected. These contracts may be either non-life contingent or life contingent. Non-life contingent annuities are accounted for as investment contracts. For life contingent annuities, the Company records a liability at the present value of future annuity payments and estimated future expenses calculated using expected mortality and costs, and expense assumptions. Any gross premiums received in excess of the net premium is the DPL and is recognized separately in income in a constant relationship with the discounted amount of the insurance in-force or expected future benefit payments. These liabilities are recorded in policy liabilities in the consolidated balance sheets.

Also included under payout annuities are liabilities for disability income benefits which pertain primarily to disability income policies that are already in claim payout status. Liabilities for disability income benefits are calculated as the present value of future disability payments and estimated future expenses using expected mortality and costs, and interest assumptions. The liabilities are recorded in policy liabilities in the consolidated balance sheets.

Whole and term life

The Company has established liabilities for amounts payable under insurance policies, including whole life insurance and term life insurance policies. These policies provide death benefits in exchange for a guaranteed level premium for a specified period of time and, in the case of whole life, a guaranteed minimum cash surrender value. Generally, liabilities for these policies are calculated as the present value of future expected benefits to be paid, reduced by the present value of future expected net premiums. Current assumptions are used in the establishment of liabilities for future policyholder benefits including mortality, policy lapse, renewal, investment returns, inflation, expenses and other contingent events as appropriate for the respective product. Each quarter, the Company updates its estimate of cash flows using actual historical experience and current future cash flow assumptions. These updated cash flows are discounted using the discount rate or curve on the original contract issue date to calculate the revised net premiums and net premium ratio, which are used to derive an updated liability for future policy benefits. This amount is then compared to the carrying amount of the liability before the updating of cash flow assumptions to determine the current period change in liability estimate. This current period change in the liability is the liability remeasurement gain or loss and is presented parenthetically as a separate component of benefit expense in the consolidated statements of income.

Policy liabilities for participating whole life insurance policies are equal to the aggregate of: (1) net level premium reserves for death and endowment policyholder benefits (calculated based upon the non-forfeiture interest rate, and mortality rated guarantee in calculating the cash surrender values described in such contracts); and (2) the liability for terminal dividends.

Product guarantees

Market risk benefits

Market risk benefits are contracts or contract features that both provide protection to the policyholder from other-than-nominal capital market risk and expose the Company to other-than-nominal capital market risk.

Notes to the interim consolidated financial statements (unaudited)

Market risk benefits include certain contract features on fixed annuity and variable annuity products. These features include minimum guarantees to policyholders, such as guaranteed minimum death benefits (GMDBs), guaranteed minimum withdrawal benefits (GMWBs), and long-term care benefits (i.e., capped at the return of account value plus one or two times the account value). Market risk benefits are measured at fair value using a non-option and option valuation approach based on current net amounts at risk, market data, experience, and other factors. Changes in fair value are recognized in net income each period with the exception of the portion of the change in fair value due to a change in the instrument-specific credit risk, which is recognized in other comprehensive income.

Additional liability for annuitization, death, or other insurance benefits

The Company establishes additional liabilities for contracts or contract features that provide for potential benefits in addition to the account balance but are not market risk benefits or embedded derivatives. These benefits include annuitization benefits and death or other insurance benefits (e.g., universal life secondary guarantees). For these benefits, the liability is the sum of the current benefit ratio multiplied by cumulative assessments and accreted interest, less excess payments.

In particular, the Company holds additional liabilities for universal life products with secondary guarantees, sometimes referred to as no-lapse guarantees. The additional liabilities are measured using the benefit ratio approach where excess benefits are spread over the life of the contract based on assessments collected from the policyholder. Generally, total expected excess benefit payments are the aggregate of death claims after the policyholder account value is exhausted. The exception is when the cost of insurance charges are insufficient to produce consistently positive earnings in the future. In this case, all death benefits are deemed to be excess benefits. For annuitization benefits, the benefit ratio is the present value of expected annuitization payments to be made less the accrued account balance at the expected annuitization date divided by the present value of expected assessments during the accumulation phase of the contract, discounted at the contract rate. Expected annuitization payments and related incremental claim adjustment expenses, expected assessments, and expected excess payments are calculated using discount rate, mortality, lapse, and expense assumptions.

The Company recognizes a shadow reserve adjustment for the additional insurance liabilities when unrealized gains and losses are included in the investment margin while calculating the present value of expected assessments for the benefit ratios. Shadow reserve adjustments are recognized in other comprehensive income.

For additional liabilities for death or other insurance benefits, the discount rate assumption is based on the contract rate at inception. The mortality, lapse, and expense assumptions are based on Company's experience, industry data, and other factors. Assumptions are reviewed and updated, if necessary, at least annually. When those assumptions are updated, the benefit ratio and the liability are remeasured, with the resulting gain or loss reflected in total benefits expense.

Outstanding claims

Outstanding claims include amounts payable relating to in course of settlement and incurred but not reported claim liabilities. In course of settlement, claim liabilities are established for policies when the Company is notified of the death of the policyholder, but the claim has not been paid as of the reporting date. Incurred but not reported claim liabilities are determined using studies of past experience and are estimated using actuarial

Notes to the interim consolidated financial statements (unaudited)

assumptions of historical claims expense, adjusted for current trends and conditions. These estimates are continually reviewed, and the ultimate liability may vary significantly from the amounts initially recognized, which are reflected in net income in the period in which they are determined. Changes in policyholder and contract claims are recorded in policy benefits and claims in the consolidated statements of income.

Closed blocks

Through its insurance companies, the Company has acquired several closed blocks of participating life insurance policies. The Company has elected to account for the closed block policy liabilities using the fair value option.

The assets and cash flow generated by the closed blocks inure solely to the benefit of the holders of policies included in the closed blocks. All closed block assets will ultimately be paid out as policyholder benefits and through policyholder dividends. In the event that the closed blocks' assets are insufficient to meet the benefits of the closed blocks' benefits, general assets of the Company would be used to meet the contractual benefits to the closed blocks' policyholders.

The closed block liabilities are measured at fair value, which comprises the fair value of the closed block assets plus the present value of projected expenses including commissions and the cost of capital charges associated with the closed blocks. In calculating the present value, the Company used a discount rate based on current U.S. Treasury rates, with a risk margin to reflect uncertainties in the closed block liability and a provision for the Company's instrument-specific credit risk.

Reinsurance

Consistent with the overall business strategy, the Company assumes certain policy risks written by other insurance companies on a coinsurance, modified coinsurance or funds withheld coinsurance basis. Reinsurance accounting is applied for these ceded and assumed transactions when risk transfer provisions have been met. To meet risk transfer requirements, a long-duration reinsurance contract must transfer mortality or morbidity risks, and subject the reinsurer to a reasonable possibility of a significant loss. Those contracts that do not meet risk transfer requirements are accounted for using deposit accounting. The Company seeks to diversify risk and limits its overall financial exposure through reinsurance.

With respect to ceded reinsurance, the Company values reinsurance recoverables on reported claims at the time the underlying claim is recognized in accordance with contract terms. For future policyholder benefits, the Company estimates the amount of reinsurance recoverables based on the terms of the reinsurance contracts and historical reinsurance recovery information. The reinsurance recoverables are based on what the Company believes are reasonable estimates and the balance is reported as an asset in the consolidated balance sheets. However, the ultimate amount of the reinsurance recoverable is not known until all claims are settled.

The cost of reinsurance, which is the difference between the amount paid for a reinsurance contract and the amount of the liabilities for policy benefits relating to the underlying reinsured contracts, is deferred and amortized over the reinsurance contract period for short-duration contracts, or over the terms of the reinsured policies on a basis consistent with the reporting of those policies for long-duration contracts. Generally, the Company amortizes cost of reinsurance based on policy count or effective yield method, retrospectively calculated based on actual and projected future cash flows. Cost of

Notes to the interim consolidated financial statements (unaudited)

reinsurance assets and liabilities are reported in insurance intangibles and policy liabilities in the consolidated balance sheets, respectively. Reinsurance contracts do not relieve the Company from its obligations to policyholders, and failure of reinsurers to honor their obligations could result in losses to the Company; consequently, allowances are established for expected credit losses, via a charge to policy benefits and claims in the consolidated statements of income. The Company's funds withheld receivable at interest and reinsurance recoverable assets are reviewed for expected credit losses by considering credit ratings for each reinsurer, historical insurance industry specific default rate factors, rights of offset, expected recovery rates upon default and the impact of other terms specific to the reinsurance arrangement.

For funds withheld and modified coinsurance agreements, the Company has the right to receive or obligation to pay the total return on assets supporting the funds withheld receivable at interest or funds withheld payable at interest. This indirectly exposes the Company to the credit risk of the underlying assets. As a result, funds withheld coinsurance and modified coinsurance agreements are viewed as total return swaps and accounted for as embedded derivatives. Embedded derivatives are required to be separated from the host contracts and measured at fair value with changes in fair value recognized in net income. Generally, the embedded derivative is measured as the difference between the fair value of the underlying assets and the carrying value of the host contract at the balance sheet date. The fair value of the embedded derivative is included in the funds withheld receivable at interest or the funds withheld payable at interest on the consolidated balance sheets. Changes in the fair value of the embedded derivative are reported in operating activities on the consolidated statements of cash flows.

Recognition of insurance revenue and related benefits

Premiums related to whole life and term life insurance contracts and payout contracts with life contingencies are recognized in premiums in the consolidated statements of income when due from the contractholders.

Amounts received as payment for universal life and investment-type contracts are reported as deposits to contractholder account balances and recorded in policy liabilities in the consolidated balance sheets. Amounts received as payment for the Company's fixed fund variable annuities are reported as a component of policy liabilities in the consolidated balance sheets. Revenues from these contracts consist primarily of fees assessed against the contractholder account balance for mortality, policy administration, separate account administration and surrender charges, and are reported in policy fees in the consolidated statements of income. Additionally, the Company earns investment income from the investment of contract deposits in the Company's insurance companies' general account portfolio, which is reported in net investment income in the consolidated statements of income.

Fees assessed that represent compensation to the Company for benefits to be provided in future periods and certain other fees are established as an unearned revenue reserve liability and amortized into revenue over the expected life of the related contracts in proportion to estimated gross profits in a manner consistent with DAC for these contracts. Unearned revenue reserves are reported in policy liabilities in the consolidated balance sheets and amortized into policy fees in the consolidated statements of income. Benefits and expenses for these products include claims in excess of related account balances, expenses for contract administration and interest credited to contractholder account balances in the consolidated statements of income.

Notes to the interim consolidated financial statements (unaudited)

Adoption of new accounting pronouncements

Targeted improvements to the accounting for long-duration contracts

Effective January 1, 2023, Global Atlantic adopted new accounting guidance for insurance and reinsurance companies that issue long-duration contracts ("LDTI"), on February 1, 2021 ("GA Acquisition Date"), on a full retrospective basis, coinciding with the acquisition of Global Atlantic by KKR.

The following table summarizes the balance of, and changes in the liability for future policy benefits as of February 1, 2021 due to the adoption of LDTI.

| Liability for future policy benefits | Payout nnuities | Other | Total | | |
|--|--------------------|-----------|-------|--------|--|
| (\$ in millions) | | | | | |
| Balance, as of February 1, 2021 | \$ 12,786 | \$ 592 | \$ | 13,378 | |
| Change in discount rate assumptions | 152 | 20 | | 172 | |
| Adjusted balance, as of February 1, 2021 | \$ 12,938 | \$ 612 | \$ | 13,550 | |

The increase to the liability for future policy benefits as of February 1, 2021, was primarily due to remeasuring the liability using a discount rate based on a spot rate yield curve that is derived based on upper medium grade (low credit risk) fixed-income instruments with similar duration to the liability.

The following table summarizes the balance of, and changes in, the net liability position of market risk benefits (previously recorded as product guarantees included within policy liabilities in the consolidated balance sheets) as of February 1, 2021 due to the adoption of LDTI.

| Market risk benefits | d-indexed nuities | Variable- and other annuities | | Total |
|---|--------------------------|-------------------------------|-----|-------------|
| (\$ in millions) | | | | |
| Balance, as of February 1, 2021 ⁽¹⁾ | \$ 896 | \$ | 325 | \$ 1,221 |
| Adjustment for the difference between prior carrying amount and market risk benefit value | 282 | | 88 | 370 |
| Adjusted balance, as of February 1, 2021 | \$ 1,178 | \$ | 413 | \$ 1,591 |

⁽¹⁾ The \$1,220.4 million balance associated with market risk benefits prior to transition was previously recorded as product guarantees either as an embedded derivative in contractholder deposits of \$236 million, or as an additional liability for insurance benefits of \$984.4 million under policy liabilities extinguished at transition, and remeasured as market risk benefits.

The transition approach for market risk benefits requires assessing products to determine whether contracts or contract features expose the Company to other than nominal capital market risk. The balance at February 1, 2021 reflects the population of market risk benefits identified. The increase to the carrying value of the market risk benefit liability as of February 1, 2021, reflects the required adjustment to remeasure the liability at fair value using current net amounts at risk, market data, experience, and other factors. The change primarily reflects the impact of discount rates and instrument-specific credit risk as of the transition date.

The following table summarizes the balance of, and changes in, reinsurance recoverable as of February 1, 2021 due to the adoption of LDTI.

Notes to the interim consolidated financial statements (unaudited)

As a result of the GA Acquisition, the Company established a new accounting basis to reflect the fair value of assets and liabilities on the GA Acquisition Date, including resetting retained earnings, deferred acquisition costs and accumulated other comprehensive income to zero. As a result of the transition coinciding with the acquisition by KKR, the transition impact of the adoption was recorded as a change to the present value of future profits reflected in the value of business acquired insurance intangible asset recognized as part of purchase accounting. The following table presents the effect of transition adjustments on the value of business acquired assets and liabilities due to the adoption of LDTI.

Notes to the interim consolidated financial statements (unaudited)

| | Februar | y 1, 2021 |
|--------------------------------------|------------|---------------|
| | VOBA | Negative VOBA |
| (\$ in millions) | | |
| Reinsurance recoverable | \$ (76) | \$ - |
| Liability for future policy benefits | 198 | (26) |
| Market risk benefits | 370 | _ |
| Total transition adjustments | \$ 492 | \$ (26) |

As a result of the retrospective application of the LDTI adoption, the Company adjusted certain previously reported amounts in its consolidated balance sheets, consolidated statements of operations, consolidated statements of comprehensive income, and consolidated statements of cash flows, as follows:

| Consolidated balance sheet as of December 31, 2022 | previously eported | Adjustment | As revised |
|--|-----------------------|------------|------------|
| (\$ in millions) | | | |
| Reinsurance recoverable | \$ 27,920 | \$ (1,899) | \$ 26,021 |
| Insurance intangibles | 1,723 | 608 | 2,331 |
| Other assets | 5,435 | (441) | 4,994 |
| Total assets | 173,443 | (1,732) | 171,711 |
| Policy liabilities | 141,224 | (3,444) | 137,780 |
| Total liabilities | 175,982 | (3,444) | 172,538 |
| Retained earnings | 1,059 | 762 | 1,821 |
| Accumulated other comprehensive loss | (9,385) | 950 | (8,435) |
| Total equity | (2,622) | 1,712 | (910) |

The cumulative impact of the retrospective application of the LDTI adoption increased net income attributable to shareholders by \$605 million and \$157 million for each of the periods ended December 31, 2022 and 2021, respectively (\$762 million cumulatively), and increased other comprehensive income by \$926 million and \$24 million for each of the periods ended December 31, 2022 and 2021, respectively (\$950 million cumulatively). These increases were primarily as a result of an increase in discount rates and instrument-specific credit risk during each of the respective periods.

| Consolidated statement of operations for the three months ended September 30, 2022 | eviously ported | Adjustment | | As revised |

Troubled debt restructurings and vintage disclosures

In March 2022, the FASB issued new guidance regarding the modification of receivables, which affects their recognition and measurement. The guidance eliminates the concept of troubled debt restructurings and instead requires all modifications to be analyzed to

Notes to the interim consolidated financial statements (unaudited)

determine whether they result in a new receivable or a continuation of an existing receivable. The guidance also makes related updates to the measurement of expected credit losses for receivables. The new guidance requires additional disclosures for receivable modifications involving borrowers experiencing financial difficulty as well as disclosure of loan charge-offs by origination year (vintage). For entities that have already adopted ASC 326 (addressing credit losses on financial instruments), the guidance was effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. The Company adopted this accounting standard effective January 1, 2023. Refer to Note 3 — "Investments – Loan modifications" for additional information.

Future application of accounting standards

Accounting for Investments in Tax Credit Structures

In March 2023, the FASB issued new guidance to expand the population of investments in tax credit structures that may be eligible to apply the proportional amortization method ("PAM"), if certain criteria are met. The election to use the PAM can be made on a tax credit program-by-program basis. Under the new guidance, certain disclosures are required for investments in tax credit programs for which the PAM is elected. The guidance is effective for fiscal years beginning after December 15, 2023, with early adoption permitted. The Company is currently evaluating the impact of this guidance on its consolidated financial statements.

3. Investments

Fixed maturity securities

The cost or amortized cost and fair value for available-for-sale, or "AFS," fixed maturity securities were as follows:

| | Cost or nortized | | llowance or credit | Gross ur | nrea | lized | | |

| Total AFS fixed maturity securities | \$ 79,56 | 3 \$ | 66,956 | | |

⁽¹⁾ Includes related party KKR corporate debt securities with amortized cost and fair value of \$2.4 billion and \$2.1 billion, respectively.

⁽²⁾ Includes related party KKR collateralized debt obligations with amortized cost, gross unrealized gains, gross unrealized losses and fair value of \$92 million, \$0 million, \$(4) million and \$87 million, respectively.

⁽³⁾ Represents the cumulative amount of credit impairments that have been recognized in the consolidated statements of income (as net investment (losses) gains) or that were recognized as a gross-up of the purchase price of PCD securities. Amount excludes unrealized losses related to non-credit impairment.

⁽⁴⁾ Includes credit loss allowances on purchase-credit deteriorated fixed-maturity securities of \$(30) million.

⁽²⁾ Includes related party KKR collateralized loan obligations with amortized cost and fair value of \$131 million and \$128 million, respectively.

Notes to the interim consolidated financial statements (unaudited)

Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties, or the Company may have the right to put or sell the obligations back to the issuers. Structured securities are shown separately as they have periodic payments and are not due at a single maturity.

Purchased credit deteriorated securities

Certain securities purchased by the Company were assessed at acquisition as having experienced a more-than-insignificant deterioration in credit quality since their origination. These securities are identified as PCD, and a reconciliation of the difference between the purchase price and the par value of these PCD securities is below:

| | | Nine mon | ths end | ed |
|---|--------------|----------|-----------------|----|
| | Septer 20 | _ | mber 30, 022 | |
| (\$ in millions) | | | | |

Unrealized gains and losses can be created by changing interest rates or several other factors, including changing credit spreads. The Company had gross unrealized losses on below investment grade AFS fixed maturity securities of \$784 million and \$836 million as of September 30, 2023 and December 31, 2022, respectively. The single largest unrealized loss on AFS fixed maturity securities was \$117 million and \$86 million as of September 30, 2023 and December 31, 2022, respectively. The Company had 6,523 and 6,349 securities in an unrealized loss position as of September 30, 2023 and December 31, 2022, respectively.

As of September 30, 2023, AFS fixed maturity securities in an unrealized loss position for 12 months or more consisted of 5,180 debt securities. These debt securities primarily relate to Corporate, RMBS, and U.S. state, municipal and political subdivisions fixed maturity securities, which have depressed values due primarily to an increase in interest rates since the purchase of these securities. Unrealized losses were not recognized in net income on these debt securities since the Company neither intends to sell the securities nor does it believe that it is more likely than not that it will be required to sell these securities before recovery of their cost or amortized cost basis. For securities with significant declines in value, individual security level analysis was performed utilizing underlying collateral default expectations, market data and industry analyst reports.

Notes to the interim consolidated financial statements (unaudited)

Allowance for credit losses on fixed maturity securities

Mortgage and other loan receivables

Mortgage and other loan receivables consist of the following:

| | September 30, | | De | cember 31, |
|---|---------------|--------|----|------------|
| | | 2023 | | 2022 |
| (\$ in millions) | | | | |
| Commercial mortgage loans ⁽¹⁾ | \$ | 20,468 | \$ | 18,831 |
| Residential mortgage loans ⁽¹⁾ | | 11,780 | | 10,689 |
| Consumer loans | | 4,635 | | 5,229 |
| Other loan receivables ⁽²⁾⁽³⁾ | | 686 | | 902 |
| Total mortgage and other loan receivables | \$ | 37,569 | \$ | 35,651 |
| Allowance for credit losses ⁽⁴⁾ | | (569) | | (560) |
| Total mortgage and other loan receivables, net of allowance for credit losses | \$ | 37,000 | \$ | 35,091 |

⁽¹⁾ Includes \$738 million and \$788 million of loans carried at fair value using the fair value option as of September 30, 2023 and December 31, 2022, respectively. The fair value option was elected for these loans for asset-liability matching purposes. These loans had unpaid principal balances of \$822 million and \$871 million as of September 30, 2023 and December 31, 2022, respectively.

The maturity distribution for residential and commercial mortgage loans was as follows as of September 30, 2023:

| Years (\$ in millions) | Residential | C | Commercial | n | Total nortgage loans |
|---------------------------|-------------|------|------------|----|----------------------------|
| Remainder of 2023 | \$ 52 | 2 \$ | 827 | \$ | 879 |
| 2024 | 217 | , | 2,209 | | 2,426 |
| 2025 | 15 | | 3,844 | | 3,859 |
| 2026 | 86 | | 5,084 | | 5,945 |
| 2027 | 842 |) | 3,038 | | 3,880 |
| 2028 | 128 | 3 | 1,355 | | 1,483 |
| 2029 and thereafter | 9,665 | | 4,111 | | 13,776 |
| Total | \$ 11,780 | \$ | 20,468 | \$ | 32,248 |

Actual maturities could differ from contractual maturities because borrowers may have the right to prepay (with or without prepayment penalties) and loans may be refinanced.

⁽²⁾ As of September 30, 2023 and December 31, 2022, other loan receivables consisted primarily of loans collateralized by aircraft of \$261 million and \$282 million, respectively, and loans collateralized by residential mortgages of \$200 million for both periods.

⁽³⁾ Includes \$8 million of related party loans as of September 30, 2023.

⁽⁴⁾ Includes credit loss allowances on purchase-credit deteriorated mortgage and other loan receivables of \$(105) million and \$(106) million as of September 30, 2023 and December 31, 2022, respectively.

Notes to the interim consolidated financial statements (unaudited)

| Total commercial mortgage loans | \$ | 15,860 | \$ | 2,519 | \$ | 452 | \$ | 18,831 |

Changing economic conditions and updated assumptions affect the Company's assessment of the collectability of commercial mortgage loans. Changing vacancies and rents are incorporated into the analysis that the Company performs to measure the allowance for credit losses. In addition, the Company continuously monitors its commercial mortgage loan portfolio to identify risk. Areas of emphasis are properties that have exposure to specific geographic events or have deteriorating credit.

The weighted average loan-to-value ratio for the Company's residential mortgage loans was 63% and 64% as of September 30, 2023 and December 31, 2022, respectively.

Loan modifications

The Company may modify the terms of a loan when the borrower is experiencing financial difficulties, as a means to optimize recovery of amounts due on the loan. Modifications may involve temporary relief, such as payment forbearance for a short period time (where interest continues to accrue) or may involve more substantive changes to a loan. Changes to the terms of a loan, pursuant to a modification agreement, are factored into the analysis of the loan's expected credit losses, under the allowance model applicable to the loan.

For commercial mortgage loans, modifications for borrowers experiencing financial difficulty are tailored for individual loans and may include interest rate relief, maturity extensions or, less frequently, principal forgiveness. For both residential mortgage loans and

Notes to the interim consolidated financial statements (unaudited)

consumer loans, the most common modifications for borrowers experiencing financial difficulty, aside from insignificant delays in payment, typically involve deferral of missed payments to the end of the loan term, interest rate relief, or maturity extensions.

The tables below presents the carrying value of loans to borrowers experiencing financial difficulty, for which modifications have been granted during the three and nine months ended ended September 30, 2023.

| Three months ended September 30, 2023 by loan type | Amo | rral of ounts ue | est Rate | aturity tension | Coi | nbination | Total | Percentage of total carrying value outstanding |
|--|-----|------------------------|--------------|--------------------|-----|-----------|----------|--|
| (\$ in millions) | | | | | | | | |
| Commercial mortgage loans | \$ | _ | \$ _ | \$ _ | \$ | 58 | \$ 58 | 0.28 % |
| Residential mortgage loans | | _ | _ | 8 | | 1 | 9 | 0.08 % |
| Consumer loans | | 2 | 1 | 8 | | 5 | 16 | 0.35 % |
| Total | \$ | 2 | \$ 1 | \$ 16 | \$ | 64 | \$ 83 | |

(1) Includes modifications involving deferral of amounts due, interest rate relief and/or maturity extension.

| Nine months ended September 30, 2023 by loan type | Deferral of Amounts Due | | Interest Rate Relief | | Maturity Combination Extension (1) Total | | Total | Percentage of total carrying value outstanding | | |
|---|-------------------------------|---|-----------------------------|----|--|----|-------|--|-----|--------|
| (\$ in millions) | | | | | | | | | | |
| Commercial mortgage loans Residential | \$ | - | \$ _ | \$ | - | \$ | 225 | \$ | 225 | 1.10 % |
| mortgage loans | | 1 | 1 | | 23 | | 3 | | 28 | 0.24 % |
| Consumer loans | | 6 | 3 | | 45 | | 14 | | 68 | 1.46 % |
| Total ⁽²⁾ | \$ | 7 | \$ 4 | \$ | 68 | \$ | 242 | \$ | 321 | |

⁽¹⁾ Includes modifications involving deferral of amounts due, interest rate relief and/or maturity extension.

All of the commercial mortgage loans that had a combination of modifications had both interest rate relief and maturity extensions. For these loans, the interest rate relief involved either a change from a floating rate or a decrease in fixed rate to a weighted average fixed rate of 3.4%. The maturity extensions for these loans added a weighted-average 2.9 years to the life of the loans. In addition, one of the commercial mortgage loans that had a combination of modifications had forgiveness of a portion of the principal due. The Company has commitments to lend additional funds of \$15.9 million for the modified commercial mortgage loans disclosed above.

The table below presents the performance status of the loans modified during the nine months ended September 30, 2023.

⁽²⁾ Loans may have been modified more than once during the year; in this circumstance, the loan is only included once in this table. In addition, certain loans that were modified in prior quarters have since been repaid in full.

Notes to the interim consolidated financial statements (unaudited)

| Performance status as of September 30, 2023 by Ioan type | C | Current | 3 | 30-59 days past due | 60-89 days past due | 90 days or ore past due | Total |

Other investments

Other investments consist of the following:

| | ember 30, 2023 | ember 31, 2022 |
|---|-----------------------|-------------------|
| (\$ in millions) | | |
| Investments in real estate ⁽¹⁾ | \$ 4,836 | \$ 4,641 |
| Investments in renewable energy ⁽²⁾ | 2,327 | 3,427 |
| Investments in transportation and other leased assets ⁽³⁾ | 2,858 | 2,822 |
| Policy loans | 873 | 869 |
| Other investment partnerships ⁽⁴⁾ | 182 | 199 |
| Federal Home Loan Bank, or "FHLB," common stock and other investments | 382 | 287 |
| Equity securities | 20 | 18 |
| Total other investments | \$ 11,478 | \$ 12,263 |

- (1) Investments in real estate are held in consolidated investment companies that use fair value accounting.
- (2) Net of accumulated depreciation attributed to consolidated renewable energy assets of \$145 million and \$230 million as of September 30, 2023 and December 31, 2022, respectively.
- (3) Net of accumulated depreciation of \$285 million and \$230 million as of September 30, 2023 and December 31, 2022, respectively.
- (4) Includes related party balance of \$1 million as of both September 30, 2023 and December 31, 2022.

The total amount of other investments accounted for using the equity method of accounting was \$1.1 billion as of both September 30, 2023 and December 31, 2022. The Company's maximum exposure to loss related to these equity method investments is limited to the carrying value of these investments plus unfunded commitments of \$20 million and \$21 million as of September 30, 2023 and December 31, 2022, respectively.

In addition, the Company has investments that would otherwise require the equity method of accounting for which the fair value option has been elected. The carrying amount of these investments was \$205 million and \$266 million as of September 30, 2023 and December 31, 2022, respectively.

Variable interest entities

The Company has created certain VIEs to hold investments, including investments in transportation, renewable energy, consumer and other loans and fixed maturity securities. These VIEs issue beneficial interests primarily to the Company's insurance entities and the Company maintains the power to direct the activities of the VIEs that most significantly impact their economic performance and bears the obligation to absorb losses or receive benefits from the VIEs that could potentially be significant. Accordingly, the Company is the primary beneficiary of these VIEs, which are consolidated. Where these VIEs or entities

Notes to the interim consolidated financial statements (unaudited)

consolidated by these VIEs issue beneficial interests to third-parties, they are reported as non-controlling interests by the Company.

The following table illustrates the Company's consolidated VIE positions:

| | Sep | tember 30, 2023 | De | cember 31, 2022 |
|--|-----|--------------------|----|--------------------|
| (\$ in millions) | | | | |
| Assets of consolidated variable interest entities: | | | | |
| Investments: | | | | |
| AFS fixed maturity securities, at fair value | \$ | 8,973 | \$ | 8,644 |
| Mortgage and other loan receivables | | 4,715 | | 5,342 |
| Other investments: | | | | |
| Investments in renewable energy | | 2,236 | | 3,285 |
| Investments in transportation and other leased assets | | 2,858 | | 2,822 |
| Investments in real estate | | 4,834 | | 4,639 |
| Other invested assets | | 98 | | _ |
| Total other investments | | 10,026 | | 10,746 |
| Total investments | | 23,714 | | 24,732 |
| Cash and cash equivalents | | 716 | | 619 |
| Accrued investment income | | 247 | | 290 |
| Other assets | | 903 | | 1,131 |
| Total assets of consolidated variable interest entities | \$ | 25,580 | \$ | 26,772 |
| Liabilities of consolidated variable interest entities: | | | | |
| Accrued expenses and other liabilities | \$ | 401 | \$ | 462 |
| Total liabilities of consolidated variable interest entities | | 401 | | 462 |
| Redeemable non-controlling interests | | 50 | | 83 |
| Non-controlling interests of consolidated variable interest entities | | 100 | | 179 |
| Total liabilities, redeemable non-controlling interests and non-controlling interests of consolidated variable interest entities | \$ | 551 | \$ | 724 |

The carrying amount and maximum exposure to loss relating to VIEs in which the Company holds a significant variable interest but is not the primary beneficiary and which have not been consolidated were as follows:

| | September 30, 2023 | | | | December 31, 2022 | | | |
|---------------------------------|--------------------|----|---|----|--------------------|----|---|--|
| | Carrying amount | | Maximum exposure to loss ⁽¹⁾ | | Carrying amount | | Maximum exposure to loss ⁽¹⁾ | |
| (\$ in millions) | | | | | | | | |
| Other investment partnerships | \$ 171 | \$ | 171 | \$ | 296 | \$ | 296 | |
| Investments in renewable energy | 90 | | 90 | | 30 | | 30 | |
| Total | \$ 261 | \$ | 261 | \$ | 326 | \$ | 326 | |

⁽¹⁾ The maximum exposure to loss relating to other limited and renewable energy partnership interests is equal to the carrying amounts. The Company also has unfunded commitments of \$24 million and \$25 million as of September 30, 2023 and December 31, 2022, respectively.

Notes to the interim consolidated financial statements (unaudited)

Repurchase agreement transactions

As of September 30, 2023 and December 31, 2022, the Company participated in repurchase agreements with a notional value of \$320 million and \$799 million, respectively. As collateral for these transactions, the Company may post AFS fixed maturity securities and residential mortgage loans, which are included in fixed maturity securities available for sale in the consolidated balance sheets. The gross obligation for repurchase agreements is reported in other liabilities in the consolidated balance sheets.

The carrying value of assets pledged for repurchase agreements by type of collateral and remaining contractual maturity of the repurchase agreements as of September 30, 2023 and December 31, 2022 is presented in the following tables:

| As of September 30, 2023 | 0 | ernight . | <30 Days | 30 |) - 90 Days | >90 Days | Total |
|----------------------------|----|-----------|----------|----|-------------|-----------|-----------|

| Total assets pledged | \$ | _ | \$ _ | \$ | 508 | \$ 326 | \$ 834 |

Other pledges and restrictions

Certain of the Company's subsidiaries are members of regional banks in the Federal Home Loan Banks (FHLB) system and such membership requires the members to own stock in these FHLBs. We owned an aggregate of \$132 million and \$129 million (accounted for at cost basis) of stock in FHLBs as of September 30, 2023 and December 31, 2022, respectively. In addition, the Company's subsidiaries have entered into funding agreements with the FHLB, which require that the Company pledge eligible assets, such as fixed maturity securities and mortgage loans, as collateral. Assets pledged as collateral for these funding agreements had a carrying value of \$3.6 billion as of both September 30, 2023 and December 31, 2022.

Insurance - statutory deposits

As of September 30, 2023 and December 31, 2022, the carrying value of the assets on deposit with various state and U.S. governmental authorities were \$137 million and \$143 million, respectively.

Net investment income

Net investment income is comprised primarily of interest income, including amortization of premiums and accretion of discounts, based on yields that change due to expectations in projected cash flows, dividend income from common and preferred stock, earnings from investments accounted for under equity method accounting, and lease income on other investments.

Notes to the interim consolidated financial statements (unaudited)

⁽²⁾ Includes losses from related party Parasol Renewable Energy Investments of \$(12) million and \$(50) million for the three and nine months ended September 30, 2023, respectively.

Notes to the interim consolidated financial statements (unaudited)

4. Derivative instruments

The Company holds derivative instruments that are primarily used in its hedge program. The Company has established a hedge program that seeks to mitigate economic impacts primarily from interest rate and equity price movements, while taking into consideration accounting and capital impacts.

The Company hedges interest rate and equity market risks associated with its insurance liabilities including fixed-indexed annuities, indexed universal life policies, variable annuity policies and variable universal life policies, among others. For fixed-indexed annuities and indexed universal life policies, the Company generally seeks to use static hedges to offset the exposure primarily created by changes in its embedded derivative balances. The Company generally purchases options which replicate the crediting rate strategies, often in the form of call spreads. Call spreads are the purchase of a call option matched by the sale of a different call option. For variable annuities and variable universal life policies, the Company generally seeks to dynamically hedge its exposure to changes in the value of the guarantee it provides to policyholders. Doing so requires the active trading of several financial instruments to respond to changes in market conditions. In addition, the Company enters into inflation swaps to manage inflation risk associated with inflation-indexed preneed policies.

In the context of specific reinsurance transactions in the institutional channel or acquisitions, the Company may also enter into hedges which are designed to limit short-term market risks to the economic value of the target assets. From time to time, the Company also enters into hedges designed to mitigate interest rate and credit risk in investment income, interest expense, and fair value of assets and liabilities. In addition, the Company enters into currency swaps and forwards to manage any foreign exchange rate risks that may arise from investments denominated in foreign currencies.

The Company attempts to mitigate the risk of loss due to ineffectiveness under these derivative investments through a regular monitoring process which evaluates the program's effectiveness. Management monitors the Company's derivative activities by reviewing portfolio activities and risk levels. Management also oversees all derivative transactions to ensure that the types of transactions entered into and the results obtained from those transactions are consistent with both the Company's risk management strategy and the Company's policies and procedures.

The restricted cash which was held in connection with open derivative transactions with exchange brokers was \$283 million and \$279 million as of September 30, 2023 and December 31, 2022, respectively.

The Company also has embedded derivatives related to reinsurance contracts that are accounted for on a modified coinsurance and funds withheld basis. An embedded derivative exists because the arrangement exposes the reinsurer to third-party credit risk. These embedded derivatives are included in funds withheld receivable and payable at interest in the consolidated balance sheets.

Credit Risk

The Company may be exposed to credit-related losses in the event of nonperformance by its counterparties to derivatives. Generally, the current credit exposure of the Company's derivatives is limited to the positive fair value of derivatives less any collateral received from the counterparty.

Notes to the interim consolidated financial statements (unaudited)

The Company manages the credit risk on its derivatives by entering into derivative transactions with highly rated financial institutions and other creditworthy counterparties and, where feasible, by trading through central clearing counterparties. The Company further manages its credit risk on derivatives via the use of master netting agreements, which require the daily posting of collateral by the party in a liability position. Counterparty credit exposure and collateral values are monitored regularly and measured against counterparty exposure limits. The provisions of derivative transactions may allow for the termination and settlement of a transaction if there is a downgrade to the Company's financial strength ratings below a specified level.

The fair value and notional value of the derivative assets and liabilities were as follows:

| | | Se | epte | mber 30, 202 | 23 | |
|--|-----|-------------|------|--------------|-------|-----------|
| | | | | Fair ' | Value | |
| | Gro | ss Notional | | Assets | Lia | abilities |

Derivatives designated as accounting hedges

Where the Company has derivative instruments that are designated and qualify as accounting hedges, these derivative instruments receive hedge accounting.

The Company has designated foreign exchange forward purchase contracts ("FX forwards") to hedge the foreign currency risk associated with foreign currency-denominated bonds in fair value hedges. These foreign currency-denominated bonds are accounted for as AFS fixed maturity securities. Changes in the fair value of the hedged AFS fixed maturity securities due to changes in spot exchange rates are reclassified from AOCI to earnings, which offsets the earnings impact of the spot changes of the FX forwards, both of which are recognized within investment-related (losses) gains. The effectiveness of these hedges is assessed using the spot method. Changes in the fair value of the FX forwards related to changes in the spot-forward difference are excluded from the assessment of hedge effectiveness and are deferred in AOCI and recognized in earnings using a systematic and rational method over the life of the FX forwards.

The Company has designated interest rate swaps to hedge the interest rate risk associated with certain debt and policy liabilities. These fair value hedges qualify for the shortcut method of assessing hedge effectiveness.

⁽²⁾ Represents netting of derivative exposures covered by qualifying master netting agreements.

Notes to the interim consolidated financial statements (unaudited)

The following table presents the financial statement classification, carrying amount and cumulative fair value hedging adjustments for qualifying hedged assets and liabilities:

| | Ca | rrying Amou Assets / (| | | Cumulative Amount of Fair Value Hedging Adjustments Included in the Carrying Amount of Hedged Assets ((Liabilities)(1) | | | | | | | | |
|--|------|--|----|---------|--|---------------------|------|---------------|--|--|--|--|--|
| | Sept | September 30, 2023 December 31, 202 | | | | ptember 30, 2023 | Dece | mber 31, 2022 | | | | | |
| (\$ in millions) | | | | | | | | | | | | | |
| AFS fixed maturity securities ⁽²⁾ | \$ | 2,111 | \$ | 2,011 | \$ | (13) | \$ | (62) | | | | | |
| Debt | | (1,535) | | (946) | | (239) | | (201) | | | | | |
| Policy liabilities | | (6,112) | | (5,671) | | (372) | | (435) | | | | | |

⁽¹⁾ Includes \$33.5 million and \$53.1 million of hedging adjustments on discontinued hedging relationships as of September 30, 2023 and December 31, 2022, respectively.

The Company has designated bond forwards to hedge the interest rate risk associated with the planned purchase of AFS debt securities in cash flow hedges. These arrangements are hedging purchases from July 2023 through December 2027 and are expected to affect earnings until 2052. Regression analysis is used to assess the effectiveness of these hedges. Regression analysis is used to assess the effectiveness of these hedges.

As of September 30, 2023 and December 31, 2022, there was a cumulative loss of \$(284) million and \$(170) million on the currently designated bond forwards recorded in accumulated other comprehensive loss, respectively. Amounts deferred in accumulated other comprehensive loss are reclassified to net investment income following the qualifying purchases of AFS securities, as an adjustment to the yield earned over the life of the purchased securities, using the effective interest method.

The Company estimates that the amount of gains/losses in accumulated other comprehensive loss to be reclassified into earnings in the next 12 months will not be material.

Derivative results

The following table presents the financial statement classification and amount of gains (losses) recognized on derivative instruments and related hedged items, where applicable:

⁽²⁾ Carrying amount is the amortized cost for AFS debt securities.

5. Fair value disclosure of financial instruments

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date ("the exit price"). The best evidence of fair value is a quoted price in an active market. If listed prices or quotations are not available, fair value is determined by reference to prices of similar instruments and quoted prices or recent prices in less active markets.

U.S. GAAP establishes a three-level valuation hierarchy based upon observable and non-observable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market assumptions. The fair value hierarchy prioritizes inputs to the valuation techniques used to measure fair value, giving the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. A financial instrument's level in the fair value hierarchy is based on the lowest level of any input that is significant to

Notes to the interim consolidated financial statements (unaudited)

fair value measurement of the financial instrument. The three levels of the fair value hierarchy are described below:

Basis of fair value measurement

Level 1: Unadjusted quoted prices in active markets to which the Company had access as of the measurement date for identical, unrestricted assets and liabilities.

Level 2: Inputs to valuation techniques are observable either directly or indirectly through quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable; and

Level 3: Model-derived where one or more inputs to the valuation techniques are significant and unobservable.

The measurement of Level 3 financial instrument fair values uses unobservable inputs that are based on management judgment and the internal determination of assumptions that market participants would use in valuing them. Valuation subjectivity increases when markets are less liquid due to the lack of more transparent market-based inputs, which may increase the potential that estimated fair values are not reflective of the price at which an actual transaction would occur.

The following tables represent the Company's hierarchy for its assets and liabilities measured and reported at fair value by the fair value hierarchy on a recurring basis:

Notes to the interim consolidated financial statements (unaudited)

Fair value techniques and inputs

The following is a description of the valuation techniques and inputs used for instruments carried at fair value. The observability of the inputs used in the valuation determines the appropriate level in the fair value hierarchy for the respective asset or liability. Also refer to Note 2–"Summary of significant account policies and practices" for additional information valuation techniques used for the respective reported balances.

Investments

Investments in U.S. Treasury, government and agency securities, foreign government securities, short-term money market securities and mutual funds held in separate accounts are valued using quoted market prices for identical unrestricted instruments in active markets. Investments such as fixed maturity securities for which quoted market prices from active markets are not available are priced using observable inputs, which can be verified to quoted prices, recent trading activity for identical or similar instruments, broker or dealer quotations or alternative pricing sources with reasonable levels of price transparency. Consideration is given to the nature of the quotations and the relationship of recent market activity to the prices provided from alternative pricing sources. Other investments having one or more significant valuation inputs that are not observable are initially valued at transaction price, which is considered to be the best initial estimate of fair value. Subsequently, the Company uses other methodologies to determine fair value, which vary based on the type of investment.

Valuation inputs and assumptions are changed when corroborated by substantive observable evidence, including values realized on sales.

Derivative instruments

Derivative instruments such as exchange-traded futures and options are valued at their quoted market price. Most of the over the counter derivative instruments used by the Company are those for which all significant valuation inputs are corroborated by market evidence. These derivative instruments are principally valued using an income approach. The Company calculates the fair value of derivative assets by discounting future cash flows at a rate that incorporates counterparty credit spreads and the fair value of derivative liabilities by discounting future cash flows at a rate that incorporates the Company's own credit spreads. When appropriate, valuations are adjusted for various factors such as liquidity, bid/offer spreads and credit considerations. Such adjustments are generally based on available market evidence.

Valuations for non-option based interest rate derivatives are based on present value techniques, which utilize significant inputs that may include the swap yield curve, LIBOR basis curves and repurchase rates. Valuations for option based interest rate derivatives are based on option pricing models, which utilize significant inputs that may include the swap yield curve, LIBOR basis curves and interest rate volatility.

Prices for foreign currency derivatives based on the exchange rates of leading industrialized nations, including those with longer tenors, are generally observable. The valuation of other derivative instruments including credit derivatives and equity market derivatives have significant unobservable inputs, such as equity volatility inputs for options that are very long dated, and are principally valued using an income approach.

Notes to the interim consolidated financial statements (unaudited)

Funds withheld at interest, reinsurance assets and policy liabilities

The funds withheld receivable at interest carried at fair value is primarily valued based on the fair value of the underlying investments, which have quoted prices or other observable inputs to pricing. A portion of the funds withheld receivable at interest carried at fair value represents embedded derivatives and is valued using present value techniques that consider inputs including contractholder persistency and contract duration. Reinsurance recoverables carried at fair value are valued using present value techniques that consider inputs including mortality and surrender rates for the associated policies, as well as estimates of policy expenses and the cost of capital held in support of the related closed block policy liabilities.

Policy liabilities carried at fair value are valued using present value techniques that discount estimated liability cash flows at a rate that reflects the riskiness of those cash flows and also consider policyholder behavior (lapse rates, surrender rates and mortality). Market risk benefits liability are valued at fair value using a non-option and option valuation approach based on current net amounts at risk, market data, Company experience, and other factors. Closed block policy liabilities carried at fair value are valued using present value techniques that consider inputs including mortality and surrender rates for the respective policies, as well as estimates of policy expenses and the cost of capital held in support of the liabilities. The funds withheld payable at interest carried at fair value represents embedded derivatives and is valued based on the change in the fair value of the assets supporting the payable. Other embedded derivative liabilities are related to our fixed-indexed annuity and interest-sensitive life products, which contain equity-indexed features. We calculate the embedded derivative liabilities as the present value of future projected benefits in excess of the projected guaranteed benefits, using an option budget as the indexed account value growth rate and considering an adjustment to reflect the risk of nonperformance on our obligation and inputs such as projected withdrawal and surrender activity, and mortality. We calculate instrumentspecific credit risk using a blend of observable peer holding company credit spreads, adjusted to reflect the claims paying ability of our insurance entities, as well as an adjustment to reflect the priority of policy claims. See details in the table below.

Fair value of assets and liabilities

Significant unobservable inputs

The tables below present the ranges of significant unobservable inputs used to value the Company's Level 3 financial assets and liabilities, and includes only those items for which information is reasonably available, such as data from internal determinations of fair value. These ranges represent the significant unobservable inputs that were used in the valuation of each type of financial asset and liability. Weighted averages in the tables below are calculated by weighting each input by the relative fair value of the respective financial instruments. The ranges and weighted averages of these inputs are not representative of the appropriate inputs to use when calculating the fair value of any one financial asset or liability. Accordingly, the ranges of inputs presented below do not represent uncertainty in, or possible ranges of, fair value measurements of the Company's Level 3 financial assets and liabilities as of September 30, 2023 and December 31, 2022. Also refer to Note 2-"Significant account

Notes to the interim consolidated financial statements (unaudited)

policies and practices" for additional information valuation techniques used for the respective reported balances.

Transfers between levels

Overall, transfers into and out of Level 3 are attributable to a change in the observability of inputs. Assets and liabilities are transferred into Level 3 when a significant input cannot be corroborated with market observable data. This occurs when market activity decreases significantly and underlying inputs cannot be observed, current prices are not available, and when there are significant variances in quoted prices, thereby affecting transparency. Assets and liabilities are transferred out of Level 3 when circumstances change such that a significant input can be corroborated with market observable data. This may be due to a significant increase in market activity, a specific event, or one or more significant input(s) becoming observable.

The tables below set forth a summary of changes in the fair value of the Company's Level 3 assets and liabilities for the three and nine months ended September 30, 2023 and 2022 respectively. The tables reflect gains and losses for all assets and liabilities categorized as Level 3 for the three and nine months ended September 30, 2023 and 2022:

| Balance, as of the end of the period | \$ | 165 \$ | 104 |

Notes to the interim consolidated financial statements (unaudited)

Significant inputs, judgments, assumptions for DAC and related amortization amounts

The Company considers surrender rates, mortality rates, and other relevant policy decrements in determining the expected life of the contract. As a part of our actual experience update for the nine months ended September 30, 2023, we updated mortality and surrender rates. These updates reduced the amortization rate for DAC and related amortization amounts by \$1 million per quarter. For the nine months ended September 30, 2022, we observed that there was no significant change in relevant inputs, judgments, or assumptions requiring an update of the amortization rate for DAC and related amortization amounts.

7. Policy liabilities

The following reflects the reconciliation of the components of policy liabilities to the total balance reported in the consolidated balance sheets as of September 30, 2023 and December 31, 2022:

| | Sep | tember 30, | De | cember 31 |
|--|-----|------------|----|-----------|
| | | 2023 | | 2022 |
| (\$ in millions) | | | | |
| | | | | |
| Policyholders' account balances | \$ | 113,904 | \$ | 112,281 |
| Liability for future policy benefits | | 14,856 | | 14,446 |
| Additional liability for annuitization, death, or other insurance benefits | | 5,139 | | 4,971 |
| Market risk benefit liability | | 775 | | 682 |
| Other policy-related liabilities ⁽¹⁾ | | 6,309 | | 5,400 |
| Total policy liabilities | \$ | 140,983 | \$ | 137,780 |

⁽¹⁾ Other policy-related liabilities primarily consists of negative VOBA (\$904 million and \$1.0 billion, respectively), policy liabilities accounted under a fair value option (\$1.2 billion and \$1.3 billion, respectively), embedded derivatives associated with contractholder deposit funds (\$3.2 billion and \$2.2 billion, respectively) and outstanding claims (\$191 million and \$254 million, respectively).

Policyholders' account balances

The following reflects the policyholders' account balances roll-forward for the nine months ended September 30, 2023 and 2022, and the policyholders' account balances weighted average interest rates, net amount at risk, and cash surrender value as of those dates:

^{(1) &}quot;Other" consists of activity related to payout annuities (without life contingencies), preneed, variable annuities, and life products.

⁽²⁾ Interest includes interest credited to policyholders' account values, and interest accreted in other components of the policyholder account balance, including investment-type contract values, host amounts for contractholder deposits with embedded derivatives, funding agreements and other associated reserves.

^{(3) &}quot;Other activity" includes policy charges, fees and commissions, transfers, assumption changes, fair value changes and the impact of hedge fair value adjustments.

⁽⁴⁾ Net amount at risk represents the difference between the face value of the insurance policy and the reserve accumulated under that same policy.

⁽⁵⁾ Cash surrender values are reported net of any applicable surrender charges, net of reinsurance.

⁽¹⁾ Payout annuities generally only have a single premium received at contract inception; As a result, the liability for future policy benefits generally would not reflect a present value for future premiums for payout annuities.

^{(2) &}quot;Other" consists of activity related to variable annuities, traditional life insurance, preneed insurance, and fixed-rate annuity products.

⁽³⁾ Reinsurance recoverables associated with the liability for future policy benefits is net of the effect of changes in discount rate assumptions of \$(339) million and \$(2.1) billion for the nine months ended September 30, 2023 and 2022, respectively.

Notes to the interim consolidated financial statements (unaudited)

The following table summarizes the amount of gross premiums related to traditional and limited-payment contracts recognized in the consolidated statement of operations for the nine months ended September 30, 2023 and 2022:

| | | Gross premiums | | | | | |
|------------------|---|---------------------------------|-------|----|-------|--|--|
| | - | Nine months ended September 30, | | | | | |
| | | 2023 2022 | | | | | |
| (\$ in millions) | | | | | | | |
| Payout annuities | | \$ | 2,194 | \$ | 1,523 | | |
| Other | | | 50 | | 56 | | |
| Total products | | \$ | 2,244 | \$ | 1,579 | | |

The following table reflects the weighted-average duration and weighted-average interest rates of the future policy benefit liability as of September 30, 2023 and December 31, 2022:

| | As of Septembe | er 30, 2023 |
|--|------------------|-------------|
| | Payout annuities | Other |
| Weighted-average interest rates, original discount rate | 3.16 % | 2.54 % |
| Weighted-average interest rates, current discount rate | 5.86 % | 5.85 % |

|---|--------------------|------|----------|
| (\$ in millions) | Payout nnuities | | Other |
| Expected future benefit payments, undiscounted | \$ 23,981 | \$ | 987 |
| Expected future benefit payments, discounted (original discount rate) | 17,321 | | 813 |
| Expected future benefit payments, discounted (current discount rate) | 14,022 | | 681 |
| Expected future gross premiums, undiscounted | _ | | 524 |
| Expected future gross premiums, discounted (original discount rate) | _ | | 431 |
| Expected future gross premiums, discounted (current discount rate) | _ | | 357 |

Significant inputs, judgments and assumptions used in measuring future policyholder benefits

Significant policyholder behavior and other assumption inputs to the calculation of the liability for future policy benefits include discount rates, mortality and, for life insurance, lapse rates. Global Atlantic reviews all assumptions at least annually, and more frequently if necessary. Accordingly, as part of the annual assumption review conducted during the nine months ended September 30, 2023, premium and lapse assumptions were revised for traditional life insurance products (included with the "Other" category), which resulted in a \$4 million favorable impact to net income before taxes.

For the nine months ended September 30, 2023 and 2022, we recognized \$306 million and \$1.6 billion in other comprehensive income, respectively, due to changes in the future policy benefits estimate from updating discount rates. During nine months ended September 30, 2023, and 2022, there were no changes to the methods used to determine the discount rates.

Additional liability for annuitization, death, or other insurance benefits

The following tables reflect the additional liability for annuitization, death, or other insurance benefits roll-forward for the nine months ended September 30, 2023 and 2022:

| | Nine months ended | | | | |
|---|-------------------|----|-------------------|--|--|
| | ember 30, 2023 | | ember 30, 2022 | | |
| (\$ in millions) | | | | | |
| Balance as of beginning of period | \$ 5,105 | \$ | 4,833 | | |
| Effect of changes in cash flow assumptions | 14 | | 17 | | |
| Effect of changes in experience | (26) | | (34) | | |
| Adjusted balance as of beginning of period | 5,093 | | 4,816 | | |
| Issuances | 20 | | 18 | | |
| Assessments | 353 | | 371 | | |
| Benefits paid | (292) | | (306) | | |
| Interest | 104 | | 111 | | |
| Balance as of end of period | 5,278 | | 5,010 | | |
| Less: impact of unrealized investment gain and losses | 139 | | 99 | | |
| Balance, end of year, net of reinsurance recoverable and impact of unrealized investment gains and losses | \$ 5,139 | \$ | 4,911 | | |

Notes to the interim consolidated financial statements (unaudited)

The additional liability for annuitization, death, or other insurance benefits relates primarily to secondary guarantees on certain interest-sensitive life products, and preneed insurance.

The following reflects the amount of gross assessments recognized for the additional liability for annuitization, death, or other insurance benefits in the Consolidated Statements of Income for the nine months ended September 30, 2023 and 2022:

| | | Gross ass | essm | nents |
|---|-----------------------------|-----------|------|-------|
| | Nine months ended September | | | |
| | | 2023 | | 2022 |
| (\$ in millions) | | | | |
| Total amount recognized within revenue in the Consolidated Statements of Income | \$ | 342 | \$ | 423 |

The following reflects the weighted average duration and weighted average interest rate for the additional liability for annuitization, death, or other insurance benefits as of September 30, 2023 and December 31, 2022:

| | As | of |
|--|---------------------------|-------------------|
| | September 30, 2023 | December 31, 2022 |
| | | |
| Weighted-average interest, current discount rate | 3.00 % | 3.00 % |
| Weighted-average liability duration (years) | 27.94 | 28.21 |

Significant inputs, judgments and assumptions used in measuring the additional liabilities for annuitization, death, or other insurance benefits

Significant policyholder behavior assumption inputs to the calculation of the additional liability for annuitization, death, or other insurance benefits include mortality and lapse rates. Global Atlantic reviews all assumptions at least annually, and more frequently if necessary. Accordingly, as part of the annual assumption review conducted during the nine months ended September 30, 2023, assumptions for lapse rates, investment yields, and option budget costs were updated, which resulted in a \$14 million increase in the additional liability for annuitization, death, and other insurance benefits. During the nine months ended September 30, 2022, assumptions for lapse rates and investment yields were updated, which resulted in a \$17 million increase in the liability.

Notes to the interim consolidated financial statements (unaudited)

Market risk benefits

| Variable- and other annuities | | _ | | 142 | | (142) | _ | 120 | | (120) |
| Total | \$ | 5 | \$ | 775 | \$ | (770) | \$ 13 | \$ 682 | \$ | (669) |

Significant inputs, judgments, and assumptions used in measuring market risk benefits

Significant policyholder behavior and other assumption inputs to the calculation of the market risk benefits include interest rates, instrument-specific credit risk, mortality rates, surrender rates and utilization rates. Global Atlantic reviews all assumptions at least annually, and more frequently if evidence suggests. Accordingly, as part of the annual assumption review conducted during the nine months ended September 30, 2023, assumptions for fixed-indexed annuity surrender and partial withdrawals, and variable annuity surrender and activations were updated, which resulted in a \$37 million favorable impact to net income before taxes. During the nine months ended September 30, 2022, assumptions for fixed-indexed annuity activations, surrender rates, option budgets, and variable and other annuity rider fees and termination rates were updated, which resulted in a \$105 million favorable impact to net income before taxes.

Separate account liabilities

Separate account assets and liabilities consist of investment accounts established and maintained by the Company for certain variable annuity and interest-sensitive life insurance contracts. Some of these contracts include minimum guarantees such as GMDBs and GMWBs that guarantee a minimum payment to the policyholder.

The assets that support these variable annuity and interest-sensitive life insurance contracts are measured at fair value and are reported as separate account assets on the consolidated balance sheet. An equivalent amount is reported as separate account liabilities. Market risk benefit assets and liabilities for minimum guarantees are valued and presented separately from separate account assets and separate account liabilities. For more information on market risk benefits see "-Market risk benefits" in this footnote. Policy charges assessed against the policyholders for mortality, administration and other services are included in "Policy fees" in the consolidated statements of income.

Notes to the interim consolidated financial statements (unaudited)

The following table presents the balances of and changes in separate account liabilities:

| | Se | pteml | oer 30, 20 | 23 | | | Se | pteml | ber 30, 20 | 22 | |
|---|--------------------|-------|----------------------------|----|-------|----|----------------------|-------|-----------------------|----|---------|

8. Debt

Debt was comprised of the following:

| | September 3 | 30, 2023 | December 3 | 1, 2022 |
|---|-------------|------------|------------|---------|
| | Amount | Rate | Amount | Rate |
| (\$ in millions, except interest rates) | | | | |
| Revolving credit facility, due August 2026 ⁽¹⁾ | \$ _ | - % | \$ 400 | 5.92 % |
| Senior notes, due October 2029 ⁽¹⁾ | 500 | 4.40 % | 500 | 4.40 % |
| Senior notes, due June 2031 | 650 | 3.13 % | 650 | 3.13 % |
| Senior notes, due June 2033 | 650 | 7.95 % | _ | - % |
| Subordinated debentures, due October 2051 | 750 | 4.70 % | 750 | 4.70 % |
| Total debt - principal | 2,550 | | 2,300 | |
| Purchase accounting adjustments ⁽¹⁾ | 41 | | 43 | |
| Debt issuance costs, net of accumulated amortization ⁽²⁾ | (37) | | (18) | |
| Fair value gain of hedged senior notes, recognized in net income | (239) | | (197) | |
| Total debt | \$ 2,315 | | \$ 2,128 | |

⁽¹⁾ The amortization of the purchase accounting adjustment related to the acquired senior notes was less than \$1 million and \$1 million for the three months ended September 30, 2023 and 2022, and \$2 million and \$7 million for the nine months ended September 30, 2023 and 2022, respectively.

Senior notes due 2033

In June 2023, Global Atlantic (Fin) Company, or "FinCo," a Delaware corporation and an indirect subsidiary of the Company, issued \$650 million aggregate principal amount of 7.950% senior unsecured notes due 2033 (the "2033 Senior Notes"). This included \$500 million issued on June 15, 2023, and a subsequent reopening of \$150 million issued on June 21, 2023. The proceeds of the 2033 Senior Notes were used, in part, to repay outstanding indebtedness under our revolving credit facility. Remaining proceeds are intended to be used for general corporate purposes. The 2033 Senior Notes were issued pursuant to an indenture, dated as of October 7, 2019, among FinCo, as issuer, GAFL, as guarantor, and U.S. Bank National Association, as trustee, and supplemented by the Third and Fourth Supplemental Indentures, dated as of June 15, 2023 and June 21, 2023, respectively, among FinCo, GAFL and the trustee. The 2033 Senior Notes are fully and unconditionally guaranteed on a senior unsecured basis by GAFL.

The 2033 Senior Notes bear interest at a rate of 7.950% per year. Interest on the 2033 Senior Notes is payable semi-annually in arrears on June 15 and December 15 of each year, beginning on December 15, 2023. The 2033 Senior Notes will mature on June 15, 2033. FinCo may, at its option, redeem some or all of the 2033 Senior Notes at any time: (i) prior to March 15, 2033 at a redemption price equal to 100% of the principal amount of the 2033 Senior Notes to be redeemed plus a "make-whole" premium and accrued and unpaid interest, if any, to the date of redemption; and (ii) on or after March 15, 2033 at a redemption price equal to 100% of the principal amount of the 2033 Senior Notes to be redeemed, plus accrued and unpaid interest to the date of redemption.

⁽²⁾ The amortization of the debt issuance costs was less than \$1 million for both the three months ended September 30, 2023 and 2022, and \$1 million and less than \$1 million for the nine months ended September 30, 2023 and 2022, respectively.

Notes to the interim consolidated financial statements (unaudited)

Debt Covenants

Borrowings of the Company contain various debt covenants. These covenants do not, in management's opinion, materially restrict the Company's operating business or investment strategies as of September 30, 2023. The Company was in compliance with such debt covenants in all material respects as of September 30, 2023.

9. Composition of other assets, liabilities, income, insurance expenses and general, administrative and other expenses

Other assets consist of the following:

| | Sep | otember 30, | De | ecember 31, |
|---|-----|-------------|----|-------------|
| | | 2023 | | 2022 |
| (\$ in millions) | | | | |
| Deferred tax asset, net | \$ | 2,708 | \$ | 2,347 |
| Unsettled investment sales ⁽¹⁾ and derivative collateral receivables | | 516 | | 663 |
| Derivative assets | | 764 | | 724 |
| Goodwill ⁽³⁾ | | 501 | | 501 |
| Intangible assets and deferred sales inducements | | 263 | | 276 |
| Current income tax recoverable | | 41 | | 23 |
| Operating lease right-to-use assets ⁽²⁾ | | 179 | | 183 |
| Premiums and other account receivables | | 164 | | 142 |
| Market risk benefit asset | | 5 | | 13 |
| Miscellaneous assets | | 188 | | 122 |
| Total other assets | \$ | 5,329 | \$ | 4,994 |

⁽¹⁾ Represents amounts due from third parties for investments sold for which cash settlement has not occurred.

The definite life intangible assets are amortized by using the straight-line method over the useful life of the assets which is 14 years. The indefinite life intangible assets are not subject to amortization. The amortization expense of definite life intangible assets was \$4 million for both the three months ended September 30, 2023 and 2022, and \$13 million for both the nine months ended September 30, 2023 and 2022.

⁽²⁾ The non-cancelable operating leases consist of leases for office space and renewal energy forward power purchase agreements in North America. The operating lease costs were \$7 million and \$6 million for the three months ended September 30, 2023 and 2022, respectively, and \$21 million and \$18 million for the nine months ended September 30, 2023 and 2022, respectively.

⁽³⁾ The Company reported a negative equity carrying amount as of September 30, 2023 primarily due to unrealized losses on available-for-sale fixed maturity investment portfolio. The Company expects that substantially all of these unrealized losses will not be realized as it intends to hold these investments to recovery as part of its asset liability cash-flow matching strategy. The Company evaluated qualitative factors, including market and economic conditions, industry-specific events and company-specific financial results, and determined that it was not more likely than not that goodwill was impaired.

Notes to the interim consolidated financial statements (unaudited)

Other liabilities consist of the following:

| | Sept | ember 30, | Dec | ember 31, |
|---|------|-----------|-----|-----------|
| | ; | 2023 | | 2022 |
| (\$ in millions) | | | | |

| Miscellaneous income | | _ | | _ | | 1 | | 1 |
| Total other income | \$ | 42 | \$ | 36 | \$ | 119 | \$ | 103 |

⁽²⁾ Includes related party balances of \$116 million and \$99 million as of September 30, 2023 and December 31, 2022, respectively.

⁽³⁾ Operating leases for office space have remaining lease terms that range from approximately 1 year to 12 years, some of which include options to extend the leases for up to 10 years. The weighted average remaining lease terms were 7.6 years and 7.0 years as of September 30, 2023 and December 31, 2022, respectively. The weighted average discount rate was 4.3% and 3.6% as of September 30, 2023 and December 31, 2022, respectively.

Notes to the interim consolidated financial statements (unaudited)

11. Redeemable non-controlling interests

During the first quarter of 2019, the Company acquired controlling interests in certain renewable energy partnerships in which the non-controlling shareholder can sell its ownership back to the Company after a specified date is reached. The Company has redeemable noncontrolling interests related to these renewable energy partnerships of \$50 million and \$83 million as of September 30, 2023 and December 31, 2022 as determined by the HLBV method. The estimated redemption value of redeemable non-controlling interests is calculated as the discounted cash flows subsequent to the expected flip date of the respective renewable energy partnership. The flip date represents the date at which the allocation of income and cash flows among the investors in the partnership is adjusted, pursuant to the redeemable non-controlling interest investors having achieved an agreedupon return. The flip date of the Company's renewable energy partnerships determines when the redeemable non-controlling interests are eligible to be redeemed. Eligible redemption dates range from January 1, 2028 to June 30, 2028. For the redeemable non-controlling interests outstanding as of September 30, 2023 and December 31, 2022, the estimated redemption value that would be due at the respective redemption dates is \$3 million and \$5 million, respectively.

12. Equity-based compensation plans

The components of long-term incentives expense were as follows:

| | 1 | hree mor | nths | ended | | Nine mon | ths e | ended |
|---|--------|----------|------|-------------|-----|------------|-------|-------------|
| | Septer | nber 30, | Sep | otember 30, | Sep | tember 30, | Sep | otember 30, |
| | 2 | 023 | | 2022 | | 2023 | | 2022 |
| (\$ in millions) | | | | | | | | |
| Book-value awards | \$ | 14 | \$ | 13 | \$ | 45 | \$ | 44 |
| KKR restricted stock units | | 4 | | 3 | | 11 | | 7 |
| Carried incentive unit awards | | _ | | 1 | | _ | | 3 |
| Total equity-based compensation expense | \$ | 18 | \$ | 17 | \$ | 56 | \$ | 54 |
| Management equity plan awards | \$ | 8 | \$ | 28 | \$ | 64 | \$ | 55 |
| Total deferred compensation expense | \$ | 8 | \$ | 28 | \$ | 64 | \$ | 55 |
| Deferred tax asset | \$ | _ | \$ | 1 | \$ | 2 | \$ | 1 |

No equity-based compensation costs were capitalized during the three and nine months ended September 30, 2023 and 2022.

Notes to the interim consolidated financial statements (unaudited)

The following table presents the Company's unrecognized compensation expense and the expected weighted average period over which these expenses will be recognized as of September 30, 2023:

| | | Septembe | r 30, 2023 | |
|--|----|----------|------------|--|
| | E | Expense | | |
| (\$ in millions, except weighted average) | | | | |
| Book-value awards | \$ | 82 | 2.13 | |
| KKR restricted stock unit awards | | 41 | 1.69 | |
| Unrecognized compensation expense, as of end of period | \$ | 123 | | |

Equity-classified awards

KKR equity incentive plans

Service-vesting awards

Employees of Global Atlantic may become eligible for the grant of KKR restricted stock units, or "RSUs," under the terms of KKR's 2019 Equity Incentive Plan. Awards are generally subject to service-based vesting, typically over a three-to-five-year vesting period. Expense associated with these RSUs is based on the 10-day average closing price of KKR & Co. Inc. common stock on the date of grant, discounted for the lack of participation rights in the expected dividends on unvested shares. Expense is recognized on a straight-line basis over the life of the award and assumes a forfeiture rate of up to 4% annually based upon expected turnover by class of recipient.

Under the terms of the KKR 2019 Equity Incentive Plan, on April 1, 2023, approximately 202,359 RSUs having an aggregate fair market value of \$10.6 million became issuable in KKR & Co., Inc. common stock. As a result, on April 3, 2023, approximately 119,518 common shares were delivered to Global Atlantic employees, net of 82,841 shares withheld for taxes. Global Atlantic reimbursed KKR in the amount of \$5.4 million for the grant-date fair value of certain RSUs granted subsequent to the initial employee grants on February 1, 2021.

The table below presents the activity related to equity-classified RSUs, for the nine months ended September 30, 2023:

| | | Nine months ended Sep 30, 2023 We | | | | | |
|--|------------------|---|---|--|--|--|--|
| Outstanding halance as of beginning of period | RSUs (shares) | avei date | eighted rage grant fair value er share | | | | |

| Transfers in (out) | (213) | | _ | | | | |
| Outstanding balance, as of end of period | 921,311 | \$ | 57.65 | | | | |

Notes to the interim consolidated financial statements (unaudited)

Liability-classified awards

Book-value awards

On February 1, 2021, the Company adopted the Global Atlantic Financial Company Book Value Award Plan, or the "Book Value Plan," to enhance the ability of the Company and its affiliates to attract, motivate and retain the best available employees and to promote the success of the business of TGAFG and its subsidiaries.

The Book Value Plan authorizes the grant of cash-settled awards, or "BVAs," representing the right to receive one or more payments upon vesting equal to the product of the Initial Value multiplied by the BV Multiple as of each applicable vesting date, or the "BV Payment Amount." The "Initial Value" of each BVA is expressed as a dollar amount determined by the Administrator and set forth in an Award Agreement. The "BVU Multiple" in respect of a BVA (which may be less than, equal to, or greater than one (1)) shall be equal to the quotient determined by dividing the Book Value of one Share of TGAFG (excluding incentive shares expected to be issued to certain senior executives) on the applicable Vesting Date by the Book Value of a Share on the Grant Date applicable to such BVA. The BVAs are expressed in dollars and generally vest in three equal, annual installments, on each of the first three anniversaries of the Grant Date, in each case, subject to the continued employment of the Participant on each such vesting date, with certain exceptions in the event of death, disability or retirement. Expense for outstanding BVAs is remeasured at each reporting period until the awards are settled or forfeited, net of an estimated forfeiture rate of 4%.

On February 1, 2021, under the terms of the Merger Agreement and in accordance with applicable plan documentation, GAFG restricted share awards unvested immediately prior to the closing converted into the right to receive a number of TGAFG BVAs having the same value and the same vesting schedule as the GAFG restricted share award immediately prior to the closing. Such BVAs were granted under the newly-authorized Book Value Plan described above.

Also in connection with the KKR acquisition of GAFG, on February 1, 2021, all active employees of TGAFG were issued a one-time grant of BVAs having an aggregate Initial Value of \$23 million. These one-time BVAs vest over five years, with the first 25% vesting on April 1, 2023 and the remainder vesting 25% annually on April 1 each subsequent year until fully vested, subject to continued employment, with exceptions in the event of death, disability or retirement. The Company is recording compensation expense over the vesting schedule of these awards, net of an estimated forfeiture rate of 4%.

The Company generally grants BVAs on an annual basis in connection with its Book Value Plan and periodically as approved by the Plan Administrator. Such awards generally vest annually over three (3) years in equal increments, subject to continued employment, with exceptions in the event of death, disability or retirement. The Company records expense over the life of the awards, with remeasurement of expense at each reporting period, until the awards are settled or forfeited. Expense related to forfeited awards is reversed in the period of forfeiture.

On April 1, 2023, BVAs having an aggregate value of approximately \$35 million vested as set forth under the terms of the Book Value Plan agreements and resulted in a cash payment on April 3, 2023 of an aggregate \$21 million to unit holders, net of applicable tax withholdings.

Notes to the interim consolidated financial statements (unaudited)

On February 28, 2023, BVAs having an aggregate value of approximately \$24 million vested as set forth under the pre-acquisition grant agreements and resulted in a cash payment of an aggregate \$14 million to participants, net of applicable tax withholdings.

The Company began recognizing long-term incentive, or "LTI," expense for the BVAs described above at the grant dates, based on their Initial Value. The table below presents the activity related to BVAs for the nine months ended September 30, 2023:

| | Nine months ended eptember 30, 2023 |
|---|--|
| (\$ in millions) | |
| Outstanding amount, as of beginning of period | \$ 139 |
| Granted | 34 |
| Forfeited | (3) |
| Vested and cash-settled | (63) |
| Outstanding amount, as of end of period | \$ 107 |

Other deferred compensation plans

Management equity incentive plan awards

The GA Equity Incentive Plan is accounted for as a hybrid compensation plan, consisting of one component most closely aligned with a profit-sharing plan under ASC 710, Compensation - General, as well as other components within scope of ASC 718, Compensation - Stock Compensation, in all cases with obligations liability-classified. Accordingly, with regard to awards within scope of ASC 710, Global Atlantic records expense based on payouts deemed to be probable and reasonably estimable based on the book value growth of Global Atlantic at the grant date and at each reporting period. For award components subject to liability-classification under ASC 718, Global Atlantic records expense, net of a 0% estimated forfeiture rate, based on the fair value of awards granted, with periodic adjustments to expense for changes in fair value, over the requisite 5-year service period.

The aggregate value of the GA Equity Incentive Plan awards at the initial date of grant was \$197 million, based on the intrinsic value of the book value component (\$5 million), as determined by applying the book value profit share percentage rate to the Company's net book value growth at the date of grant, and the fair value of the market value and assets under management, or "AUM," components at the date of grant (\$192 million, collectively), based on management's best estimate of aggregate excess market value and projected AUM, respectively, over the 5-year vesting schedule. A forfeiture rate of 0% is applied for each component. Expense is remeasured accordingly at each reporting period and adjusted as needed until the awards are forfeited or settled.

During the nine months ended September 30, 2023, 77 incentive units were granted to employees and 35 incentive units were forfeited. As of September 30, 2023 and December 31, 2022, there were approximately 887 and 845 incentive units outstanding under the Plan, respectively.

The Company recorded compensation expense of \$8 million and \$28 million for the three months ended September 30, 2023 and 2022, respectively, and \$64 million and \$55 million for the nine months ended September 30, 2023 and 2022, respectively, related to periodic

Notes to the interim consolidated financial statements (unaudited)

change in expense for Units granted under the MEP, with a corresponding offset to other liabilities. As of September 30, 2023, there was approximately \$90 million of unrecognized expense related to the GA Units granted under the GA Equity Incentive Plan with a weighted average service period remaining of 2.34 years.

13. Income taxes

The provision for income taxes represents federal and state income taxes. The effective tax rate for the three months ended September 30, 2023 and 2022 and nine months ended September 30, 2023 and 2022 was 5.5%, 21.8%, 2.1% and 20.8%, respectively. The effective tax rate on income before income taxes for the three and nine months ended September 30, 2023 and 2022 differs from the U.S. federal statutory rate primarily due to certain Bermuda-based earnings.

At each reporting date, management considers new evidence, both positive and negative, that could impact the future realization of deferred tax assets. Management will consider a release of the valuation allowance once there is sufficient positive evidence that it is more likely than not that the deferred tax assets will be realized. Any release of the valuation allowance will be recorded as a tax benefit increasing net income or other comprehensive income. As of December 31, 2022, management recorded a partial valuation allowance of \$89 million reducing the deferred tax asset related to the unrealized losses on available-for-sale securities held by Global Atlantic. As of September 30, 2023, management recorded no change to the valuation allowance balance of \$89 million. Management intends to hold the majority of these securities until the recovery of the losses, which may be at maturity, as part of its asset liability cash-flow matching strategy and will continue to monitor its position and may make changes to the valuation allowance in future periods as circumstances change.

The Company's U.S. domiciled subsidiaries' federal income tax returns are routinely audited by the Internal Revenue Service, or "IRS," and when appropriate, provisions are made in the consolidated financial statements in anticipation of the results of these audits. The tax years under examination by the IRS vary by company; however, the earliest tax year that remains open is 2011.

In December 2019, the FASB issued new guidance to simplify the accounting for income taxes. This guidance eliminates the exceptions to the incremental approach, to accounting for basis differences when there are changes in ownership of foreign investments, and to interim period tax accounting for year-to-date losses that exceed anticipated losses and included, among other provisions, tax guidance related to franchise taxes. The guidance is effective for public business entities that meet the definition of an SEC filer for fiscal years beginning after December 15, 2020, including interim period within those fiscal years. The Company has been reporting franchise taxes as provided by ASU 2019-12 and therefore no material impact to financial statements.

On August 16, 2022, the Inflation Reduction Act (the "IRA") was signed into law. In general, the provisions of the IRA will be effective beginning with the fiscal year 2023, with certain exceptions. The IRA includes a new 15% corporate minimum tax. As required under the authoritative guidance of ASC 740, Income Taxes, we reviewed the impact on income taxes due to the change in legislation and concluded there was no impact to the financial statements as of September 30, 2023. The Company is in the process of evaluating the potential future impacts of the IRA, and will continue to review and monitor the issuance of additional guidance from the Internal Revenue Service.

Notes to the interim consolidated financial statements (unaudited)

14. Commitments and contingencies

Commitments

The Company enters into lease contracts, the most significant being leases of office space for its operations and land leases for its consolidated solar subsidiaries. The Company reports these leases as right-to-use assets with a corresponding lease liability in other assets and accrued expenses and other liabilities in the consolidated balance sheets. The lease liability represents the present value of the lease payments to be made over the lease term and is calculated using a discount rate equal to the Company's incremental borrowing rates, which range from 1.3% to 7.8% depending on the term. As of September 30, 2023, the Company has a right-to-use asset of \$155 million (net of \$22 million in deferred rent and lease incentives) and a corresponding lease liability of \$177 million. As of December 31, 2022, the Company has a right-to-use asset of \$183 million (net of \$22 million in deferred rent and lease incentives) and a corresponding lease liability of \$205 million.

The Company has commitments to purchase or fund investments of \$4.6 billion and \$5.2 billion as of September 30, 2023 and December 31, 2022, respectively. These commitments include those related to commercial mortgage loans, other lending facilities and investments in limited partnerships, joint ventures and LLCs. The commitment periods vary, with most extending for the next 3 years, but some extend longer. Some of these investment commitments may be subject to conditions that must be met prior to funding. For those commitments that represent a contractual obligation to extend credit, the Company has recorded a liability of \$29 million for current expected credit losses as of September 30, 2023.

In addition, the Company has entered into certain forward flow agreements to purchase loans. These agreements, and our obligations under them, are subject to change, curtailment, and cancellation based on various provisions including repricing mechanics, due diligence reviews, and performance or pool quality, among other factors.

On April 30, 2013, GAFG, GAFLL and Global Atlantic (Fin) Company, a Delaware-domiciled holding company ("FinCo") entered into a Tax Benefit Payment Agreement with Goldman Sachs. In connection with the KKR transaction, effective February 1, 2021, GAFLL merged with and into GAFG and is no longer a party to the agreement. The agreement was the result of transactions entered into prior to the separation from Goldman Sachs that resulted in approximately a \$234 million tax liability relating to the Company. Under this agreement, FinCo has agreed to pay Goldman Sachs \$214 million over a 25-year period, subject to certain deferral conditions. This agreement represents payments to Goldman Sachs corresponding to taxes paid on the Company's behalf prior to the separation from Goldman Sachs. This payable was established on the Company's balance sheet at its present value of \$140 million on April 30, 2013. The Company recognized less than \$1 million for the one month ended January 31, 2021 in related interest expense in the consolidated statements of income. The Company made principal payments of \$12 million as of January 31, 2021.

Contingencies

Guarantees

In connection with the \$750 million Subordinated Debentures due 2051 issued by FinCo, the Company has agreed to fully and unconditionally guarantee the notes on a subordinated, unsecured basis.

Notes to the interim consolidated financial statements (unaudited)

In connection with the \$650 million Senior Notes due 2033 issued by FinCo, the Company has agreed to fully and unconditionally guarantee the notes on a senior unsecured basis.

In connection with the \$650 million Senior Notes due 2031 issued by FinCo, the Company has agreed to fully and unconditionally guarantee the notes on a senior unsecured basis.

In connection with the \$500 million Senior Notes due 2029 issued by FinCo, the Company has agreed to fully and unconditionally guarantee the notes on a senior unsecured basis.

In connection with the 5-year \$1.0 billion RCF entered into by FinCo on August 4, 2021, the Company has agreed to jointly and severally guarantee, together with any subsidiary guarantors, payment and performance of FinCo's obligations under the RCF when due if not promptly paid by FinCo for the benefit of the lenders. The guarantees provided by the Company and any subsidiary guarantors are released when all commitments and obligations under the RCF have been paid in full or when the RCF commitments expire or are terminated upon the merger of certain subsidiary guarantors with or into FinCo in accordance with the terms set forth in the RCF. In September 2022, FinCo entered into an amendment of the GA Credit Agreement to adjust the interest rates based on the term SOFR and to make certain conforming changes related to converting the facility from interest rates based on LIBOR to interest rates based on SOFR. As of September 30, 2023, the Company was the only guarantor under the RCF.

In connection with a Tax Benefit Payment Agreement entered into between FinCo, as payor, and Goldman Sachs, as payee, in 2013, GAFLL and GAFG have agreed to guarantee the payment and performance of FinCo, for the benefit of Goldman Sachs. In connection with the KKR transaction, effective February 1, 2021, GAFLL merged with and into GAFG and is no longer a party to the agreement. See Note 16—"Related party transactions" for additional information on the Tax Benefit Payment Agreement.

In lieu of funding certain investments in loan facilities to third party borrowers in cash, the Company has arranged or participated in letters of credit issued by third-party banks on behalf of the borrowers in the amount of \$22 million, as of September 30, 2023, with expiration dates between May 2024 to November 2024. The Company has available lines of credit that would allow for additional letters of credit to be issued on behalf of certain borrowers, up to \$168 million, as of September 30, 2023. For accounting purposes, these letters of credit are considered guarantees of certain obligations of the borrowers. If a letter of credit were to be drawn, the Company would be obligated to repay the issuing third-party bank, and the Company would recognize a loan receivable from the borrowers on the balance sheet. The Company monitors the likelihood of these letters of credit being drawn, and any related contingent obligation. As of both September 30, 2023 and December 31, 2022, the expected credit loss on the contingent liability associated with these letters of credit was not material. See Note 16—"Related party transactions" for additional information on the letters of credit.

Legal matters

The Company is currently and expects to become from time to time involved in litigation and regulatory actions. Litigation, including class actions, or regulatory actions could result in the payment of substantial settlements, increase costs, require changes to operations, divert management attention, cause reputational harm or make it more challenging to attract and retain customers, employees and agents at the Company. Such matters include pending examinations, including related to policy administration, and class action lawsuits, including related to safeguarding of customer data. Given the inherent difficulty of predicting the outcome of the Company's litigation and regulatory matters, particularly in cases or

Notes to the interim consolidated financial statements (unaudited)

proceedings in which substantial or indeterminate damages or fines are sought, the Company cannot estimate losses or ranges of losses for cases or proceedings where there is only a reasonable possibility that a loss may be incurred.

Although the Company's ultimate legal and financial responsibility and our actual future expenditures to address regulatory, litigation and related matters cannot be estimated at this time and could prove to be materially different from the amount that we accrue or reserve for, the Company believes that certain liabilities are probable and can be reasonably estimated and accordingly has recorded a total reserve for all regulatory, litigation and related matters of approximately \$5 million as of both September 30, 2023 and December 31, 2022.

Financing arrangements

The Company has financing arrangements with unaffiliated third parties to support the reserves of its affiliated special purpose reinsurers. Total fees associated with these financing arrangements were \$5 million for both the three months ended September 30, 2023 and 2022 and \$15 million for both the nine months ended September 30, 2023 and 2022, and are included in insurance expenses in the consolidated statements of income. As of both September 30, 2023 and December 31, 2022, the total capacity of the financing arrangements with third parties was \$2.3 billion.

Other than the matters disclosed above, there were no outstanding or unpaid balances from the financing arrangements with unaffiliated third parties as of both September 30, 2023 and December 31, 2022.

15. Reinsurance

The Company maintains a number of reinsurance treaties with third parties whereby the Company assumes fixed annuity, variable annuity, payout annuity, universal life, variable universal life and term life insurance policies on a coinsurance, modified coinsurance and funds withheld basis. The Company also maintains other reinsurance treaties including the cession of certain fixed annuity, variable annuity, payout annuity, universal life policies, individual disability income policies and discontinued accident and health insurance.

The effects of all reinsurance agreements on the consolidated balance sheets were as follows:

| | September 30, 2023 | | | cember 31, 2022 | |
|--------------------------|-----------------------|----------|----|--------------------|--|

A key credit quality indicator is a counterparty's A.M. Best financial strength rating. A.M. Best ratings are an independent opinion of a reinsurer's ability to meet ongoing obligations to

Notes to the interim consolidated financial statements (unaudited)

policyholders. The Company mitigates counterparty credit risk by requiring collateral and credit enhancements in various forms including engaging in funds withheld at interest and modified coinsurance transactions. The following shows the amortized cost basis of the Company's reinsurance recoverable and funds withheld receivable at interest by credit quality indicator and any associated credit enhancements the Company has obtained to mitigate counterparty credit risk:

| | | As c | of September 30, 2 | 023 | 3 | | As | of D | ecember 31, 20 | 22 | |

⁽¹⁾ Ratings are periodically updated (at least annually) as A.M. Best issues new ratings.

As of September 30, 2023 and December 31, 2022, the Company had \$2.8 billion and \$2.9 billion of funds withheld receivable at interest, respectively, with six counterparties related to modified coinsurance and funds withheld contracts. The assets supporting these receivables were held in trusts and not part of the respective counterparty's general accounts.

⁽²⁾ At amortized cost, excluding any associated embedded derivative assets and liabilities.

⁽³⁾ Includes funds withheld payable at interest and deferred intangible reinsurance assets and liabilities.

⁽⁴⁾ Includes credit loss allowance of \$21 million and \$41 million as of September 30, 2023 and December 31, 2022, respectively, held against reinsurance recoverable.

⁽⁵⁾ Includes \$20.1 billion and \$21.0 billion as of September 30, 2023 and December 31, 2022, respectively, associated with cessions to co-investment vehicles (the "Ivy Vehicles") that participate in qualifying reinsurance transactions sourced by Global Atlantic.

The Company holds collateral for and provides collateral to our reinsurance clients. The Company held \$26.4 billion and \$26.1 billion of collateral in the form of funds withheld payable on behalf of our reinsurers as of September 30, 2023 and December 31, 2022, respectively. As of September 30, 2023 and December 31, 2022, reinsurers held collateral of \$1.2 billion and \$1.3 billion on behalf of the Company, respectively. A significant portion of the collateral that the Company provides to its reinsurance clients is provided in the form of assets held in a trust for the benefit of the counterparty. As of September 30, 2023 and December 31, 2022, these trusts held in excess of the \$68.7 billion and \$65.8 billion of assets it is required to hold in order to support reserves of \$64.2 billion and \$62.4 billion, respectively. Of the cash held in trust, the Company classified \$61 million and \$31 million as restricted as of September 30, 2023 and December 31, 2022, respectively.

16. Related party transactions

The Company has investment management service agreements with KKR. KKR provides investment management services across the Company. The Company recorded expenses for these agreements of \$112 million, \$83 million, \$331 million and \$216 million for the three months ended September 30, 2023 and 2022 and nine months ended September 30, 2023 and 2022, respectively, and had \$112 million and \$90 million payable due to KKR as of September 30, 2023 and December 31, 2022, respectively.

Notes to the interim consolidated financial statements (unaudited)

The Company has agreements to lease office space from KKR. The Company recorded expenses for these agreements of \$2 million, \$2 million, \$6 million and \$7 million for three months ended September 30, 2023 and 2022 and nine months ended September 30, 2023 and 2022, and had \$4 million and \$9 million payable due to KKR as of September 30, 2023 and December 31, 2022, respectively.

In 2022, the Company and Panamint Capital, or "Panamint," a utility-scale renewable energy developer, entered into a series of agreements whereby the Company invested in a minority equity position in Panamint and agreed to provide financing to its operations. In addition, the Company has the option to purchase projects sourced by Panamint and finance related redevelopment work. The agreements with Panamint enable the Company to exercise significant influence over the operating and financial policies of Panamint. The Company reported a loan receivable of \$8 million and an equity method investment of \$1 million in Panamint as of September 30, 2023.

During third quarter 2023, the Company purchased controlling interests in projects sourced by Panamint that we now consolidate. Panamint is operating and will redevelop the projects, in exchange for certain fees and a minority equity stake in the projects. The amount of these purchases of controlling interests totaled \$94 million. These project investments are reported in Other Investments.

On February 15, 2022, the Company acquired controlling interests in Drawbridge, a \$1.6 billion portfolio of commercial real estate, a portion of which had previously been held by KKR owned fund investments.

On December 13, 2021, the Company acquired an equity interest in Avenue One Holdings ("Avenue One") that enables the Company to exercise significant influence. Avenue One provides services related to certain real estate investments held by the Company, including sourcing, renovating and managing properties. The Company paid \$5 million, \$8 million, \$22 million and \$40 million to Avenue One during the three months ended September 30, 2023 and 2022 and nine months ended September 30, 2023 and 2022, respectively, for the sourcing, renovation and management of properties. Amounts related to sourcing and renovating properties are recognized in the cost of the real estate on the balance sheet, and the management fees are recognized in net investment income. As of September 30, 2023 and December 31, 2022, there was \$1 million and \$3 million, respectively, payable outstanding to Avenue One under the related services agreement.

The Company has provided financing to a related party, Parasol Renewable Energy Holdings, LLC, in which the Company owns a 20% equity share. The financing is used to fund the development of renewable energy projects. The loan used to fund the projects was paid off in December 2022. The Company reported an equity investment of \$62 million and \$112 million as of September 30, 2023 and December 31, 2022, respectively.

The Company held related party investments in its portfolio as of September 30, 2023 and December 31, 2022 as follows:

17. Subsequent events

The Company evaluated all events and transactions through November 14, 2023, the date the accompanying consolidated financial statements were available to be issued, that would merit recognition or disclosures in the consolidated financial statements, and determined there were none.
